SUMMARY

Motivated and quick-learning **Software Developer** with knowledge of React.js, JavaScript, PHP, SQL, Java, and Python. Passionate about building clean, responsive web applications and eager to start a career where I can learn, contribute, and grow in a professional environment.

PROJECT

Student Result Analysis System

- A Python-based tool that analyzes student marks from a CSV file to generate key insights like average, highest, and lowest scores
- Calculates pass/fail statistics, identifies top performers, and visualizes the top 10 scores in a bar chart
- Built using Python with Pandas for data analysis and Matplotlib for data visualization.

Real Estate Web App

real-state-project-1.netlify.app/

- Developed a responsive real estate platform allowing users to explore property listings.
- Implemented search and filter functionality to easily find properties based on user preferences.
- Created property detail cards with images, pricing, and key information for better user experience..

Virtual Platform

virtual-main-pp.netlify.app/

- Built an interactive virtual platform with smooth navigation across multiple sections/pages.
- Implemented modern animations and transitions to enhance user engagement and visual appeal.
