ABOUT ME

Experienced **System Administrator** with **2+ years of expertise** in administering enterprise **IT environments**. Experienced in **server management, user administration,** and **network services** like **DNS, DHCP, FTP, NFS, Samba,** and **clustering solutions**. Proficient in **system patching, kernel upgrades, backup & recovery,** and **performance tuning**. Strong problem-solving skills with a track record of ensuring uptime, security compliance, and operational efficiency.

LINUX SKILLS

- **RHEL 8/9, CentOS, Ubuntu & SUSE**
- **Networking, LVM Management, RAID, SSH, Crontab & AT**
- **USER Management, Permission Management, Sticky Bit and ACL**
- **Patching and OS Migration**
- **Apache & Nginx, DNS, DHCP, Samba, NFS**
- **AUTOFS, FTP, SFTP, ISCSI Server and NAS Server**
- **Monitoring (ZABBIX Tool)**
- Knowledge of **VMware Virtualization**
- Knowledge of **Ansible, MYSQL Databases** and **Docker**
- Knowledge of **Shell Scripting**

CCNA SKILLS

- Knowledge of **IP Addressing** and **Subnetting**
- Knowledge of **Networking Cables**
- Knowledge of **TCP/IP & OSI Model**
- Router & Switches access via console cable and Basic Configuration
- Routing Protocol - **RIP, EIGRP & OSPF**
- Knowledge of **VLSM & NAT**

MICROSOFT SKILLS

- Windows Server **2012R2/2019**
- Configure & Manage Domain **ADDS, DC, CDC & ADC**
- Configure & Manage **DHCP** and **DNS Server**
- **GPO & OU**
- **FSMO Roles & Web Server IIS**

CERTIFICATIONS

- **CCNA** (Cisco Certified Network Associate)
- **RHCSA** (Red Hat Certified System Administrator)
- **MCSA** (Microsoft Certified Solutions Associate)

PROFESSIONAL EXPERIENCE

System Administrator

IP Solutions Technologies

Jul 2023- present

Key responsibilities

Managing Installation and Configuration of **RedHat, Ubuntu, CentOS, SUSE**.

Implemented permissions for users and groups including **Sticky Bit, SUID, SGID, ACLs, UMASK, SUDO privileges**

Work with **hard links, soft links** and **INODE** management for storage utilization.

Archived and **compressed** file using **tar, gunzip, bunzip, xz, zip** method and **rsync & scp** for backup and transfer.

Bootting Process: Understood and managed **GRUB, runlevel, systemd services** and **journal logs**.

Configure **online/local repositories** and managed packages using **YUM, DNF, RPM, and APT**.

Managed firewall rules using **firewalld** and handle **SELinux** policies

Configured **static IPs, DNS, DHCP, hostname** and performed network diagnostics using **ping, traceroute** and **nmcli**.

Monitored system performance with cli based commands **top, df, du, vmstat, iostat, free, uptime** and tool **zabbix**.

Automate system tasks using **cron job scheduling** and **shell scripting** for **backups, log rotation** and **health monitoring**

Managed **LVM creation, resizing, snapshots, extension, deletion, recovery, VG merge** and **VG export on ext4,XFS** and swap file systems.

Configure and managed **RAID 0, RAID 1, RAID 5** setups for data redundancy .

Perform system **Patching** and handled **OS Migration** and also resolve **GRUB RESCUE** and **KERNEL PANIC error**

Setup **SSH** with password less Authentication by public and private keys.

Web server- Configured and managed Apache and **Nginx with load balancing and Reverse proxy**

Servers - Configured and managed **FTP, SFTP, NFS, AutoFS** and **SAMBA** servers for secure file sharing .

Storage - Configured and managed **ISCSI storage** and **NAS** for centralized secure data storage

Mail Server - Configure and managed **Zimbra Collaboration Suite**
Configured and managed **HA Clusters** using tools (**Pacemaker** and **Corosync**)

EDUCATION

Bachelor of SCIENCE, Kanpur University
