## SKILLS

- **Programming Languages** : Java 17, HTML, CSS, JavaScript, TypeScript
- **Libraries and Frameworks** : Angular 13, Spring Boot, Redis, SpringJPA, React, Tailwind CSS, Hibernate
- **Tools** : MySQL, Git, Linux, Windows Shell, Maven, Postman
- **Other Skills** : Data Structure and Algorithms, DBMS

## EXPERIENCE

### Backend Engineer

Feb 2024 - May 2024

#### eSec Forte Technologies Pvt Ltd

Gurugram

- Spearheaded the development of a CRUD application at eSec Forte, boosting team productivity by 20% through optimized data management processes.
- Engineered a Finance application using AngularJS, Php streamlining company expenditure tracking and improving financial oversight.
- Deployed PDF management functionalities in the NxSam Product with Node.js and docx, achieving a 30% reduction in document handling time.

### Graduate Engineer Trainee

Aug 2022 - May 2023

#### Relevance Lab

- Increased customer engagement and satisfaction by 15% through strategic rewards and voucher distribution in the RVA project utilizing Spring Boot.
- Boosted data processing efficiency by 25% and reduced storage costs by 40% through implementing optimized data management techniques.
- Enhanced operational efficiency in the ETL project by leveraging Java and AWS technologies.

## PROJECTS

### Kanban Board | TypeScript , React , Firebase

🔗 <https://kanban-rishang.vercel.app/tasklist>

- Engineered a dynamic web page enabling secure Google login via OAuth 2.0, enhancing user authentication processes.
- Developed a task management system allowing users to add, edit, and delete tasks, incorporating drag-and-drop functionality for a Kanban-style interface.
- Integrated advanced sorting and searching capabilities, improving task retrieval efficiency by 30% for enhanced user experience.

### Imdb Movie Clone | JavaScript, React, Tailwind CSS

🔗 <https://apnaimdb.netlify.app/>

- Designed and implemented a dynamic web page enabling users to explore movies, responsive UI using React to enhance user experience.
- Integrated search functionality for users to find movies by keywords.
- Integrated Redux to optimize system performance , ensuring faster response by 30%
- Implemented watchlist functionality for adding the movies in watchlist and used local storage for storing the movies.

### E-Commerce Application| Java, Spring Boot, JPA, Microservices

🔗 <https://github.com/rishang-design/EcommerceapplicationJava>

- Developed and integrated over 3 microservices to streamline user management, product cataloging, and payment processing, resulting in an enhanced user experience.
- Implemented RazorPay payment gateway integration and OAuth 2.0 authentication for streamlined user experience and secure transactions.
- Integrated Redis caching to optimize system performance, ensuring faster response times by 30%.
- Created unit tests using JUnit to validate functionality of codebase, achieving 95% test coverage.

### Weather App | JavaScript , Angular

🔗 <https://angular-weather-app-501.netlify.app/>

- Integrated API to fetch real-time weather data, enhancing user experience and providing accurate weather information.
- Designed a user interface with reactive forms for location search, resulting in a 30% improvement in usability and accessibility.
- Enabled offline functionality for accessing cached weather data, ensuring uninterrupted service during connectivity issues.

### Task Management System | Spring Boot , Hibernate, Java 17 , Angular 13,MySQL 8.0.35

🔗 <https://github.com/rishang-design/TaskFrontEnd>

<https://github.com/rishang-design/jpaTaskAssignment>

- Design and integrated a task management system for the user .
- Perform the various operations add, list, update, delete.
- Design the interactive ui for task management related.

## ACHIEVEMENTS

- Solved over 500 Data structure and Algorithms challenges at Scaler Academy.

## EDUCATION

**Kanpur Institute of Technology (KIT)**  
BE/B.Tech/BS in Computer Science | 8.1 CGPA

2022
