Objective

Seeking an entry-level Web Developer position to enhance my skills, secure job stability, and support my professional growth while contributing to the organization's success. I am proficient in HTML, CSS, JavaScript, React, Python, SQL, Java, and Dot Net, with hands-on experience from university projects and internships. I am eager to learn new skills, expand my knowledge, and leverage my experience.

Experience

- **Internship From Grey Shades Software Solutions PVT. LTD.** June 2024 - Sept 2024
Web developer

Skills

- **HTML5, CSS3, Javascript, React Js, Python, SQL, Dot Net, Bootstrap.**

Projects

- **Myntra clone:**
Description: Developed the frontend and backend of a Myntra e-commerce platform clone, replicating its user interface and core functionalities. The project features product browsing, **add-to-cart** and **remove-from-cart** functionality, as well as **user authentication** processes such as **login** and **registration**.
Technologies Used: HTML, CSS, JavaScript, React, Bootstrap, Dot Net (for server-side logic).
Role: Designed User Interface, Implemented Cart Functionality, Ensured Responsiveness, Implement backend functionality.
- **Social Media Website:**
Description: Developed a social media application allowing users to create and share posts about their feelings. The application features a user-friendly interface built with **HTML, CSS, Bootstrap**, and **React.js**, and utilizes **Context API** and **React Hooks** for state management and **routing**.
Technologies Used: HTML, CSS, Bootstrap, React.js.
Role: Designed User Interface, Implemented, Integrated State Management, Set Up Routing.
- **Speech Recognition Using Python:**
Description: Speech Recognition is a voice command-based assistant service written in **Python**. It can recognize human speech, interact with the user, and execute basic commands. **TTS** (Text-to-Speech) engines are used to convert text into speech, which can then be processed by **NLP** (Natural Language Processing) systems.
Role: Algorithm Design, Model Training, Integration, Performance Optimization, Testing and Validation.
