

AADARSH SONI

+917869499899 • aadarshsoni.dev@gmail.com • /aadarshsoni • Aadarsh-soni • Portfolio

EDUCATION

Op Jindal University, Raigarh, India

Mar 2022 - Present

Btech. Computer science

GPA: 8.11/10

- Programming, Data Structures & Algorithms, Computer Architecture, Operating Systems, Database Management Systems (DBMS), Computer Networks, Software Engineering, and Mathematics

EXPERIENCE

Binimise Labs

Bengaluru, India (Remote)

Ui Ux Developer (intern)

Nov 2024 - Present

- Designed and prototyped user interfaces in Figma for modules such as Task Management, Project Management, Expense Tracking, and Asset Management, improving accessibility, visual consistency, and overall user workflows.
- Developed responsive frontend components using Next.js (TypeScript, modular design, reusable UI elements) to enhance usability, performance, and seamless navigation across the platform.
- Implemented secure backend services with Feathers.js, including RESTful APIs, database integration, and role-based access, ensuring reliable communication between frontend and backend systems.
- Delivered production-ready features with a focus on scalability, maintainability, and performance, aligning software solutions with business requirements and improving user experience across multiple modules.

BlueDot.

Dublin, Ireland (Remote)

Ui/Ux Design Lead (Contract)

Jun 2025 - Jul 2025

- Led end-to-end UI/UX design and prototyping in Figma, conducting stakeholder workshops, feedback sessions, and usability testing to deliver a user-centered design system that improved engagement, accessibility, and satisfaction across platforms.
- Designed and guided development of cross-platform mobile applications (Android & iOS), ensuring intuitive navigation, consistent visual design, and enhanced user workflows through wireframes, interactive prototypes, and scalable design systems.
- Collaborated with cross-functional teams including product managers, frontend developers, and backend engineers to align business requirements with user needs, ensuring accurate design-to-development implementation and timely delivery.
- Delivered production-ready UI assets and design systems with a focus on scalability, maintainability, and usability, streamlining developer handoff and improving efficiency in building reliable, user-friendly applications.

Thanima

Kerala, India (Remote)

Ui/Ux Designer (Contract)

Nov 2024 - Feb 2025

- Designed the complete mobile application interface in Figma for a resort's internal operations, creating tailored user journeys for Admin, Staff, and Tour Guide roles to ensure accessibility, functionality, and role-specific workflows.
- Developed wireframes, interactive prototypes, and high-fidelity mockups, applying responsive design principles, visual hierarchy, and usability best practices to deliver an intuitive cross-platform user experience.
- Collaborated with stakeholders and cross-functional teams to gather requirements, refine workflows, and conduct iterative usability testing, translating feedback into actionable design improvements.
- Delivered a production-ready design system and mobile UI kit, ensuring design consistency, scalability, and developer-friendly implementation, while enhancing operational efficiency for resort staff.

Roadlyne

Bilaspur, India (Remote)

Ui/Ux Designer (Contract)

Aug 2024 - Nov 2024

- Designed and prototyped responsive user interfaces in Figma, applying visual hierarchy, accessibility standards, and design consistency to improve usability and streamline user workflows across web applications.
- Created interactive wireframes, high-fidelity prototypes, component libraries, and scalable design systems, ensuring UI consistency, reusability, and developer-friendly handoff for faster implementation.
- Conducted user research, stakeholder interviews, and iterative usability testing, analyzing feedback and translating insights into data-driven design improvements that enhanced user satisfaction and aligned with product goals.
- Collaborated with cross-functional teams including product managers, frontend developers, and backend engineers to ensure accurate design-to-development implementation, delivering production-ready UI assets that reduced development turnaround time and improved efficiency.

Bridge Healthcare

Bengaluru, India (Remote)

Ui/Ux designer (Intern)

May 2024 - Jul 2024

- Designed and delivered the complete UI for the TradeGospel website in Figma, building a responsive design system that improved usability, accessibility, and user engagement across devices.
- Created interactive wireframes, prototypes, and high-fidelity mockups for a healthcare tracking machine (ATM-style body scan device), ensuring an intuitive user experience tailored to diverse user groups.
- Conducted iterative usability testing and design reviews, validating workflows, simplifying complex interactions, and ensuring alignment with medical compliance standards and user expectations.
- Collaborated with product managers, engineers, and stakeholders to translate business requirements into scalable, user-centric designs, with the healthcare tracking system successfully deployed and live at Varanasi Railway Station.

Ainrion

Delhi, India (Remote)

Ui Ux Developer (Contract)

Apr 2024 - Jun 2024

- Designed and prototyped the complete UI for the Ainrion website in Figma, applying visual hierarchy, accessibility standards, and responsive design principles to deliver a seamless cross-device user experience.
- Developed high-fidelity wireframes, interactive prototypes, and scalable design systems, establishing a consistent design language that improved usability and accelerated developer handoff.
- Collaborated with product managers and developers to gather requirements, refine user flows, and ensure accurate translation of design specifications into functional web applications.
- Delivered a production-ready website through end-to-end UI/UX design processes, from conceptualization to deployment, aligning with Ainrion's brand identity and enhancing user satisfaction.

PROJECTS

Stock Management App

Aug 2025 - Sep 2025

- I built a full-stack inventory management system using **Next.js 15 (App Router, TypeScript, ShadCN UI, Tailwind CSS)** for the frontend and **Prisma with PostgreSQL** for the backend, deploying the application on **Vercel and Supabase** to ensure scalability, reliability, and production-grade performance.
- I implemented core business workflows such as **JWT-based authentication with middleware protection, product and supplier management, purchase and sales tracking, warehouse transfers, and real-time low-stock alerts**, ensuring secure and efficient inventory operations.
- I engineered robust backend logic using **Next.js API routes and Prisma transactions** to maintain **data consistency across stock, purchases, and transfers**, while securing endpoints through **authentication and access control**.
- I optimized the user experience by utilizing **ShadCN UI components** to build a modern, responsive dashboard while addressing production challenges such as **API proxying, cookie-based JWT authentication, and streamlined deployment pipelines** for improved reliability and performance.

Web File Sharing Platform

Jul 2025 - Jul 2025

- I developed a secure web-based file sharing platform using **Next.js 15 (App Router, TypeScript, ShadCN UI, Tailwind CSS)** for the frontend and **Prisma with PostgreSQL** for the backend, deploying the application on **Vercel and Supabase** to ensure scalability, reliability, and production-ready performance.
- I implemented core features for the file sharing platform, including **JWT-based authentication with middleware protection, secure file uploads and downloads, role-based access control, storage management, and real-time activity tracking** to ensure security, reliability, and efficient user operations.
- I engineered backend APIs using **Next.js API routes and Prisma transactions** to maintain **data integrity across file storage, sharing permissions, and access logs**, while enforcing **strong authentication and security controls** for reliable system performance.
- I enhanced the user experience by building a **modern dashboard with ShadCN UI**, addressing production challenges such as **large file handling, cookie-based JWT session management, and streamlined deployment workflows** to improve reliability and performance.

Alumni Association System

Nov 2024 - Dec 2024

- I built a full-stack Alumni Association web platform with **React** for the frontend hosted on **Vercel** and a secure backend using **Node.js, Express, and MongoDB** deployed on **Render**, enabling seamless connectivity, data management, and interaction between alumni and administrators.
- I designed an **intuitive, responsive, and accessible user interface in Figma**, focusing on **user-centric navigation, mobile compatibility, and scalable layouts**, which improved **usability, accessibility, and engagement** across devices.
- I integrated robust backend features such as **authentication, role-based access control, and data encryption**, ensuring **secure data management, system reliability, and compliance with privacy and security standards**.
- I implemented dynamic functionality including **alumni registration, event updates, announcements, and profile management**, creating a **centralized platform for communication, engagement, and networking** within the alumni community.
- I collaborated with a **cross-functional team of designers, developers, and product managers** to align requirements, refine workflows, and deploy **scalable backend APIs**, achieving **low latency, high reliability, and an improved user experience**.
- I successfully launched and deployed the application with **100% uptime post-deployment**, delivering a design optimized for **scalability, reliability, and future feature expansion**.

Tech Learner – AI-Based IT Training System

Nov 2023 - Jan 2023

- I developed an **Android application and companion website** to upskill IT employees, integrating **interactive learning modules and real-time progress tracking** to enhance engagement and training efficiency.
- I integrated **AI/ML algorithms** to deliver **personalized learning paths**, using **adaptive recommendations** to improve employee engagement and increase training efficiency.
- I designed an **intuitive and user-friendly interface in Figma**, applying principles of **accessibility, responsive design, and seamless navigation** to enhance the overall user experience across both web and mobile platforms.
- I implemented a **secure backend in Python using Spring Security on IntelliJ**, enabling **role-based access control** and ensuring the protection of sensitive training data.
- I managed structured data using **MySQL Server 2008**, ensuring **data consistency, reliability, and efficient retrieval** to support real-time training analytics and reporting.
- I successfully integrated all components into a **scalable and cohesive training platform**, delivering measurable improvements in **workforce learning outcomes, engagement, and skill adoption**.

ACHIEVEMENTS

Finalist – Smart India Hackathon, Organized by AICTE & MHRD

Nov 2024

Advanced to the national-level finale by building a robust prototype, showcasing technical proficiency, teamwork, and problem-solving skills.

Finalist – Young Innovators Challenge (YIC), Organized by AICTE & MHRD Oct 2024
Recognized for an innovative project idea addressing a social/technical challenge, shortlisted among participants across multiple institutions.

Finalist – Smart India Hackathon, Organized by AICTE & MHRD Nov 2023
Selected as one of the top teams nationwide for proposing a scalable solution to real-world problem statements provided by industry and government bodies.

Winner – Tech-Lab (Working Model), Organized by OPJU Raigarh Mar 2023
Developed and presented a functional working model, recognized for innovation and practical application among competing student teams.

SKILLS

Languages: Typescript, Javascript, Python

Library/Frameworks: Nextjs, Node, ReactJS, FastAPI, Numpy, Pandas, Express.js, Prisma

Authentication: Jwt, Middleware, Supabase Database, Firebase Auth, Clerk

Design: Figma (Design Software), Adobe Photoshop

Database: Firebase, MongoDB, Supabase, Neon, PostSql
