Experiences

▪ National Institute of Electronics & Information Technology

Web Developer

- Developed and implemented robust models, controllers, routers, and authentication systems, resulting in a 50% reduction in database query response time and enhanced overall system performance.

August 2024 – Present

Projects

• Blood Bank App :

- Developed a **MERN-based** blood bank app.
- Created to **connect blood donors** and **streamline blood donation management**.
- Designed the app's architecture, integrated MongoDB for data storage, and utilized React for the user interface.

• Ecommerce Website :

- Constructed an **MERN-based** ecommerce website.
- Aimed to provide **P-0 functionalities** for online shopping and efficient **order management**.
- Utilized Express.js for the backend, React for the frontend, and MongoDB for data storage.

- **Food Order App:** 
 - Developed an app for **food online orders**.
 - Created to facilitate **seamless food ordering** from restaurants.
 - Designed the app's user-friendly interface, integrated payment gateways, and optimized performance for a smooth experience.

Achievements

- Got gold medal for the first position in State level volleyball inter college tournament.
- Got second position in inter School Kabaddi Tournament

- Got Second Position in inter school speech competition

Strengths

- Creativity, Stress Management, Collaborative Teamwork.
- Proficiency in Analyzing Complex Problems and Formulating Effective Solutions.

Trainings & Certifications

- **Full Stack Development Course** - Sri Balaji Infotech -
(Issue Date -25/09/2022)
- **React Online Training** - Simply Learn -
(Issue Date -08/09/2022)
