Skills

Languages: C++, Python, Dart

Developer Tools: Github, Jupyter Notebook, MS Excel, PyCharm

Libraries/Frameworks: NumPy, Pandas, Flutter

Cloud/Databases: Firebase, SQL

Relevant Coursework : Data Structures and Algorithms, Object Oriented Programming, Operating Systems, Computer Networks

Projects

Groupie | *Flutter, Firebase*

Github Link

- Created a multi-screen group chatting application with Flutter and Firebase, focusing on a simple, attractive, and user-friendly UI design
- Implemented a streamlined email and password sign-in process for new users and created a login screen for existing users. This ensures a smooth authentication experience, making it easy for new users to join and for existing users to access their accounts effortlessly
- Managed the development of group creation and search functionalities. These features facilitate easy group set up and efficient searching, making the platform more intuitive and user-friendly
- Improved the user experience by implementing detailed profile and group information pages as this enhancement offers thorough and accessible information, which helps them better understand and interact with profiles and groups on the platform

Diwali Sales Analysis | *Python, Pandas, NumPy, Jupyter Notebook*

- Transformed raw datasets by performing data cleaning and manipulation
- Conducted Exploratory Data Analysis (EDA) using Pandas, Matplotlib, and Seaborn; identified key trends and patterns that increased data-driven decision-making accuracy.
- Improved customer experience by identifying potential customers across different states, occupations, and genders and analyzed data to identify top-performing products across multiple categories
- Created detailed charts and graphs, such as bar plots and count plots, to provide an insightful visual representation of data columns

Multi-lingual Digit Speech Recognition | *Python, Pandas, PyCharm*

- Developed a multilingual speech recognition system using CNN architecture and OpenAI's Whisper for language identification for Indian Languages Gujarati, Marathi, Bengali, and Malayalam
- Implemented a language identification using OpenAI's whisper model which identified the language spoken by the person
- Created a dataset for the Indian languages, preprocessed them, and trained the model using the data
- Obtained an accuracy of more than 95 for correctly identified language and spoken digits and demonstrated the whole system with an application

Education

Amrita School of Engineering, Bengaluru

Oct 2020-June 2024

Electronics and Communication Engineering

Green Fields School

March 2019- July 2020

ISC, Uttar Pradesh

Position of Responsibility

Technical and Non-Technical Member GDSC ASEB

February 2022 - July 2023

Senior Executive CodeChef ASEB

September 2022 - July 2023

Achievements

Ranked within the top 10 participants in the UI/UX track at Developer Days Hackathon September-2021
