## Education

|                                                   |                          |
|---------------------------------------------------|--------------------------|
| Dr. Virendra Swarup College of Management Studies | Kanpur, Uttar Pradesh    |
| Bachelor of Computer Applications                 | September 2022 – Present |

## Technical Skills

Programming Languages: JavaScript (JS), TypeScript (TS), Java, Python, C, C++, MySQL, MongoDB, HTML, CSS  
Framework: Next.js  
Front End: ReactJS, Context-api, React Redux, TailwindCSS, Shadcn, GSAP, React Hook Form  
Back End: Node.js, NextAuth.js, Express.js, MongoDB, Mongoose ODM, MySQL  
Developer Tools: Git, Vercel, Render, GitHub, VS Code, Postman, ThunderClient  
Other Skills: Strong problem-solving, team collaboration, attention to detail, verbal communication

## Projects

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                         |

## Online Learning and Project Experience

- Acquired skills and knowledge in Next.js, MERN Stack, TypeScript, Java, and GSAP through self-directed learning through online platforms.
- Developed and deployed applications focusing on quality, performance, and interactive UI using modern technologies and frameworks.
