Experience

WOODWISER (Agnija Tie Up Pvt Ltd)

Business Development Manager (Oct 2024 – Current)

- Employed by Agnija Tie-up Pvt. Ltd. (Amoortih Pipes and Tubes Pvt. Ltd.), operating under the brand name WOODWISER.
- Develop and maintain strategic relationships with clients, identifying opportunities for business growth while ensuring compliance with regulatory standards, which aligns with the need for vigilance in financial transactions and identifying potential risks.
- Analyze market trends, competitor behavior, and customer data to identify patterns and opportunities for expansion, skills that are applicable when detecting suspicious activity and understanding financial behavior patterns in an AML context.
- Collaborate with cross-functional teams, including compliance and legal, to ensure business strategies align with regulatory requirements, enhancing risk management and contributing to robust internal controls.
- Implement effective reporting systems and KPIs for tracking business performance, a skill transferable to developing systems for monitoring financial transactions and ensuring accurate regulatory reporting.
- Use CRM and other analytical tools to track sales data and customer interactions, a practice that can be applied to monitoring transaction data for patterns that may indicate suspicious or illegal activity.
- Conduct risk assessments of potential business opportunities, aligning them with compliance frameworks, a skill useful for identifying and mitigating potential financial crimes in financial systems.
- Develop and maintain a pipeline of business opportunities, driving growth while ensuring that each opportunity is vetted for legal and ethical standards, a key aspect of maintaining compliance with financial regulations.

TRIAC ELECTRONICS PVT LTD

Business Analyst (Mar 2023 – Oct 2024)

- Developed and retained clients to generate revenue in B2B and B2C markets.
- Conducted data analysis and created detailed reports for revenue analysis using Excel and Power BI.
- Developed and maintained websites and backend designs for Triac Electronics and related companies using PHP and CSS.
- Conducted research and development for electronic components, specializing in obsolete part replacement and procurement.
- Continuously identified opportunities for process improvement, streamlining workflows and implementing solutions that enhanced efficiency and productivity across projects.
- Experienced in using project management tools like JIRA and Asana to track compliance tasks, manage investigations, and facilitate communication across teams, ensuring adherence to regulatory deadlines and reporting requirements.
- Managed the recruitment and training of personnel for compliance roles, ensuring teams are equipped with up-to-date knowledge of regulatory standards and processes, both for local and international markets.
- Developed and maintained Excel-based financial models to track transaction flows and identify potential risk patterns, improving revenue forecasting accuracy and enhancing detection of suspicious activities.
- Collaborated with cross-functional teams, including legal and compliance, to identify and implement process improvements in procedures, resulting in a 12% increase in operational efficiency and better identification of red flags in transactions.
- Managed and analyzed large datasets related to transactions and client behavior using SQL, improving operational efficiency by 10% and strengthening the detection of fraudulent activity. Conducted data cleansing to enhance the accuracy of monitoring systems and increase system performance by 15%.
- Implemented data validation and checks to ensure the accuracy and integrity of compliance data, increasing data accuracy by 20% and improving the quality of reports used for regulatory filings.

ATAL TINKERING LAB (NITI AYO)

Projects and Office In-Charge (Apr 2021 – Feb 2023)

- Collaborated with the Department of Education, Estonia, Edtech Department, Finland, and Embedded Development Team, Poland.
- Worked with the Ministry of Education, India under the Atal Innovation Mission.

- Trained at the Vikram A Sarabhai Community Science Centre, Ahmedabad.
- Developed and implemented embedded IoT and robotics-based projects using Arduino and Raspberry Pi.
- Presented and demonstrated projects at national and international conferences.
- Procured components and kits for the lab, managing inventory and supplier relationships.
- Created project synopses and developed prototypes, ensuring alignment with educational goals.
- Collaborated with the IT team to ensure Tableau server and data sources were properly configured and maintained, resulting in a 15% improvement in system reliability and uptime.
- Converted traditional report solutions into Power BI report solutions, spiking efficiency by 15%
- Consolidated data from various sources into a single database, reducing reporting time by 40%
- Streamlined invoice tracking process through Excel Formulas and PivotTables, cutting reconciliation time by 25%

Personal Projects

- **Electronics Company In-Corporation (Singapore)**

Planned and processed the incorporation of an electronic components trading company targeting the Middle East and Africa.

- **Quality Testing Lab Setup (Hongkong)**

Planned the setup of a quality testing lab for electronic components, including tests like decapsulation, X-ray inspection, and electrical testing.

- **Smart Drainage System**

Developed a prototype with Arduino and a servo motor to enhance cleanliness in various public and private places.

- **Fuel Capacitive Indicator**

Created a project to indicate precise fuel volume in a tank, displayed on a screen integrated with a speedometer.

Technical Skills

- Programming Languages: C, C++, Python, PHP, CSS
- Development Tools: MS Word, PowerPoint, Excel, Microsoft Power BI, Corel Draw, Canva
- Additional Interests: Telecommunication, Digital Electronics, Data Analytics
- Technical Interests: Embedded Systems, IoT, Robotics, VLSI, Circuit Design

Additional Skills

- **SQL:** Database design, Data modelling, Query optimization, Performance tuning, Server Integration Services (SSIS), SQL Server Reporting Services (SSRS)
- **Advance Excel:** Pivot tables, Charts and graphs, Data Validation, Index Match, Conditional Formatting, Power Query, VLOOKUP, IF, and SUMIF functions, Data Manipulation, Data Validation, Data Analysis
- **Tableau:** Dashboard Design, Data Blending, Statistical Analysis, Big Data Management
- **Power BI:** Connecting to Data, Visualization, Data modelling, DAX (Data Analysis and Expressions), Performance Optimization
- **JIRA:** Utilized JIRA to manage project tasks, track progress, and collaborate with teams to ensure timely delivery of project milestones.
- **Asana:** Leveraged Asana to organize tasks, set deadlines, and streamline team collaboration for efficient project execution.

Personal Traits

- Strong analytical and problem-solving skills
- Proficient in Canva graphic designing and content writing
- Skilled in website creation and backend development
- Excellent verbal and written communication skills
- Leadership abilities and team management

Trainings & Certificates

- ACE of the Initiative 2023 (Triac Electronics Pvt Ltd)
- Data Analytics Certificate from Google and Coursera
- Digital Smart Certificate from AWS
- Completed 6 Weeks Professional IOT Training
- Unbox Tinkering Certificate from Niti Ayog
