PROJECTS

COURSESTACK - EDTECH PROJECT 

GITHUB | REACT JS, EXPRESS JS, TAILWIND, MONGODB

- Build an Edtech Project where multiple Instructors can login and create courses.
- Generated OTP for **login/signup** functionality for multiple users.
- Users can buy courses and make payment with cards or UPI Id.
- Integrated **Razorpay Payment Gateway** to make payment.
- Users can view recorded lectures in course.
- Users can Add **Review** to the course which will be displayed on the home page.

RANDOM PASSWORD GENERATOR 

GITHUB | HTML, CSS, JAVASCRIPT

- The Password generator tool creates a random and customized password for users .
- I have used JavaScript Math.random() and Math.floor() method.
- In the same way we have determined a variable (copyText) of the ID (password) of that input.

WEATHER APP 

GITHUB | HTML, CSS, JAVASCRIPT

- It shows Weather in different Cities using **OpenWeather API**.
 - It fetches Weather information from **OpenWeather API** and shows it on UI.
 - It shows temperature, wind speed, humidity and clouds in city.
-
