EDUCATION

Babu Banarasi Das University

Bachelors of Computer Application (Hons.) - 9.4

August 2020 - June 2023

Master of Computer Application - 8.9

August 2023 - June 2025

WORK EXPERIENCE

Digipodium

MERN Stack Trainee

August 2023 - June 2023

As a trainee developed proficiency in React, HTML, CSS, JavaScript, and Bootstrap. Designed and implemented project "DigiHub" for Digipodium institute, enabling digital credential provision to students.

Shri Balaji Infotech

Summer Internship

August 2025 - June 2025

Designed and implemented project "GatherHub", a MERN stack platform for organizing and managing events with user authentication and real-time features. Added live updates and notifications to improve user engagement during events.

PROJECTS

Project 1: DigiHub

DigiHub is a digital credential management platform developed using the MERN stack. It allows educational institutions to securely issue, manage, and verify students' course completion certificates. The application features responsive admin and student dashboards, integrates RESTful APIs for efficient credential handling, and ensures secure data storage and retrieval through MongoDB.

Project 2: GatherHub

GatherHub is a MERN stack-based event management platform designed to help users organize and manage events such as workshops and seminars. It includes a responsive user interface built with React and Tailwind CSS, RESTful API integration, and real-time communication features powered by MongoDB Atlas, ensuring seamless interaction between organizers and participants.

Project 3: Basic Web Apps& Games

Developed interactive browser-based applications including Tic-Tac-Toe, Stone Paper Scissor, To-Do List, and a Calculator using HTML, CSS, and JavaScript. These projects implemented real-time game logic, task handling features, responsive designs, and instant result displays to provide an engaging and user-friendly experience.

SKILLS

- **Programming Languages:** Python, Java, HTML5, CSS, JavaScript
- **Frontend Technologies:** React.js, Bootstrap, Tailwind CSS, jQuery
- **Backend Technologies:** Node.js, Express.js, PHP (Larval)
- **Database Systems:** MongoDB, MySQL
