Education

Moradabad Institute of Technology (A.K.T.U)

Bachelor of Science in Computer Science: CGPA: 7.12

JUNE 2021 – May 2025

Moradabad, Uttar Pradesh

Global Public School

Intermediate: Percentage - 64.8%

Session Year 2021

Amroha, Uttar Pradesh

Global Public School

Matriculation: Percentage - 74.4%

Session Year 2019

Amroha, Uttar Pradesh

Relevant Coursework

- Data Structures
- Software Engineering
- Computer Networks
- Algorithm Analysis
- Database Management
- Computer Architecture

Certification

Summer Trainee - Development Intern (Explorin)

July 2024 – August 2024

- Built and deployed 2 full-stack MERN applications, each with 100+ active users, integrating secure authentication and real-time data updates.
- Designed 20+ RESTful APIs in Express.js, enabling seamless data exchange between frontend and backend.
- Integrated MongoDB to manage and retrieve user and transaction data (handling 100 records), using indexing and aggregation for faster query performance.

PCAP:Programming Essential in Python (Cisco Networking Academy)

July 2022 – December 2022

- Gained foundational knowledge of Python programming, including syntax, data structures, and algorithms.
- Learned practical applications of Python in domains like web development and data analysis.
- Developed skills in handling data with Python, with insights into debugging and writing efficient code.

Projects

Hospital Management System | Python

August 2024

- Developed a comprehensive Hospital Management System in Python to streamline hospital operations. The system manages patient records, doctor appointments, medical staff scheduling, billing, and inventory. It features user authentication for different roles (admin, doctors, staff) and a user-friendly interface with options for managing patient admissions, discharge processes, and treatment histories. Integrated a database (SQLite/MySQL) to store and retrieve patient and staff information efficiently.

Doctor Appointment Booking System | MERN Stack, Tailwind CSS

March 2025

- Developed a full-stack appointment booking system for patients and doctors using the MERN stack. Enforced user authentication and role-based access (Patient/Doctor/Admin) using JWT.
- Built appointment booking functionality with real-time availability check and slot management. Created separate dashboards for doctors and patients to manage appointments and schedules.
- Designed RESTful APIs to handle appointment creation, modification, and cancellation.

Food Ordering Website | HTML, CSS, JavaScript, MongoDB, Express, React, Node.js

October 2024

- Developed a dynamic and responsive food website using HTML, CSS, JavaScript, and the MERN stack (MongoDB, Express, React, Node.js). The site features an intuitive user interface for browsing menus, placing orders, and making payments. Integrated an admin dashboard for managing orders, menus, and customer data. Implemented a secure payment gateway and user authentication system. Delivered the project within deadline, significantly improving user engagement and online sales for the client.

Technical Skills

Languages: JavaScript, C++, HTML/CSS, SQL, Java, Python

Developer Tools: VS Code, Postman, Vercel, Render.

Technologies/Frameworks: React, Express.js, Tailwind, MongoDB, Git/GitHub.

Interests

Hobbies: Networking, Listening to Music and Travelling
