--	---------------------------

- Read and Improve Documentation Learned about Markdown(.md) Files.
- Contributed to 4+ Front End Open Source Projects.
- Learned about Git windows,GitHub pull and push request.
- Collaborated with project maintainers and other contributors to address issues and improve code quality.

Projects

EmployeeManagementCRUDApp .Net Core, ERP Core, MySqlServer
• Developed a Employee Management CRUD (Create, Read, Update, Delete) App using .NET Core, ERP Core, and Microsoft SQL Server. • Developed a user interface using technologies such as ASP.NET Core MVC or Razor Pages. • Deployed the application locally or on a server, overcoming deployment challenges. • Designed and implemented the database schema for storing employee information.
Docs Mini App Reactjs, HTML, Tailwind CSS, Javascript
• Implementing animations using Framer Motion enriched my skill set by introducing me to declarative animation syntax and complex motion effects. • Working on the mini app reinforced the concept of breaking down UI into reusable components, promoting modularity and scalability.

Technical Skills

Languages: Javascript, Java, HTML, CSS, Python,C#
Technologies: React.js, .Net Core, Spring Boot, Tailwind CSS, MySql

Nielit Certifications

B Level (Pursuing), A Level, O Level CCC
