PROFESSIONAL SUMMARY

I am a Data Analyst with expertise in Python, SQL, and JavaScript, skilled in using Pandas and NumPy to uncover trends. I create interactive dashboards with Power BI and Excel to simplify complex data. With a background in statistical analysis and machine learning, I apply techniques like Linear Regression and K-Means Clustering to solve problems and drive decisions

EDUCATION

- Master of Computer Application (MCA)** September 2022-June 2024.
(Integral University, Lucknow)
- Bachelor of Science (B.Sc)** July 2018-July 2021.
(University of Lucknow, Lucknow)

TECHNICAL SKILLS

Programming Languages: Python, JavaScript.

Tools and Libraries: Pandas, NumPy, Selenium, BeautifulSoup, Sklearn, Git, Matplotlib, Seaborn, SQL, MS-Excel, PowerBI, Jupyter Notebook, Kaggle, VS Code, Bootstrap, Tailwindcss.

Business Intelligence & Visualization: Power BI (DAX, ETL, Dashboards), Microsoft Excel (Advanced Formulas, VLOOKUP, PivotTables, Charts), Data Storytelling, Reporting.

Statistical Analysis & Machine Learning Techniques: Z-test, T-test, CHI Squared Test, ANOVA, Data Modeling, Linear Regression, K-Means Clustering, Data Analysis, Logistic Regression, K-Nearest Neighbors (K-NN), Decision Tree, Support Vector Machine (SVM), Data Manipulation, Web Scraping.

PROJECTS

- Music Store Analysis** | SQL, Extraction and Cleaning | GitHub Jul'24-Jul'24
- Engineered and executed complex **SQL** queries to extract actionable insights into customer spending patterns, identifying five high-revenue cities and boosting targeted marketing effectiveness by 20%.
 - Streamlined inventory management by applying data-driven strategies, **reducing stock discrepancies by 40%** and enhancing responsiveness to market demands for top artists and genres.
 - Interpreted customer purchase data, leading to a 20% increase in personalized marketing campaign effectiveness and contributing to a **15% rise in overall sales**.
- Web Scraping from E-Commerce** | Python, Selenium, BeautifulSoup, Pandas | GitHub Aug'24-Aug'24
- Devised an efficient **Python-based scraping** solution that automated the extraction of product data from e-commerce sites.
 - Implemented advanced pagination and proxy server management techniques, leading to a **25% reduction** in manual efforts and ensuring seamless processing of concurrent web requests.
 - Stored the extracted data in structured format (CSV) for analysis using **Beautifulsoup** and ensured data accuracy by implementing validation checks, error handling and retry mechanisms during the scraping process.
- Netflix Data Analysis** | Data Manipulation, Pandas, NumPy, Matplotlib and Seaborn | GitHub Aug'24-Aug'24
- Perform advanced data manipulation using **Pandas**, streamlining data processes by 30%.
 - Managed multi-indexing, cross-tabulation, and efficient data slicing, **minimizing analysis time by 25%** and improving data accuracy by 20%.
- Paris Olympic 2024 Dashboard** | Python, PowerBI, Power Query, DAX | GitHub Aug'24-Aug'24
- Automated data extraction from Kaggle for Olympic datasets spanning 1896-2020 and prepared data for Paris 2024, reducing manual processing time **by 40%** and increasing data availability for analysis in **PowerBI**.
 - Developed new columns using DAX and merged queries based on similar columns, enhancing data accuracy by 30%
 - Implemented automatic dataset updates with DAX, boosting insight efficiency by 50% and **lowering update time by 60%**.

CERTIFICATIONS

- SQL (Basic) – HackerRank.
- Data Analyst Training – Udemy.
- Python Certification – Softpro India Pvt Limited.
- SQL (Intermediate) – HackerRank.
- Python with Flask – Udemy.

DECLARATION

The information provided above is accurate to the best of knowledge and the responsibility for the correctness of these particulars is acknowledged.
