OBJECTIVE

To be an indispensable part of a value-driven organization that provides ample growth opportunities and a continuous learning environment to enhance my career prospects making optimum utilization of my knowledge and skills.

PROFESSIONAL SKILL

Ms Excel

Leadership Skill

Ms word

Communication Skill

TECHNICAL SKILL

Firewall

Hardware

Network Monitoring

Troubleshooting Route & Switching Wireless Networking

EDUCATION

Graduation/ B.Tech, Computer science in Cyber security & Forensics

2016 – 2020

DIT University, Dehradun

EXPERIENCE

Sr. Networking Engineer

June, 2024 – Till Date

NCRTC | Government Of India

- Design, deploy, and maintain network infrastructure for Railway signalling projects, ensuring reliability/high-availability and secure connectivity.
- Configure and manage network devices such as routers, switches, DSL products, convertors, firewalls, and wireless access points.
- Monitor network performance, identify issues, and implement solutions to optimize efficiency and reliability.
- Collaborate with project teams to understand network requirements and provide technical expertise during project planning and execution.
- Troubleshoot and resolve network-related issues promptly to minimize downtime and disruptions.
- Document network configurations, processes, and procedures for future reference and compliance purposes.
- Ensure network security by implementing and maintaining appropriate security protocols and measures.
- Stay updated with the latest advancements in networking technology and industry best practices.
- Roubleshoot and resolve network-related issues promptly to minimize downtime and disruptions.Document network configurations, processes, and procedures for future reference and compliance purposes

Networking and Hardware Engineer
Just Ready I Lucknow

Nov, 2020 – June, 2024

- Updating existing network equipment and advising on the purchase of new systems
 - Informing leaders and senior managers of network status
 - Protecting data by maintaining firewalls, implementing data security systems and performing data backups when necessary

-

CERTIFICATES

Udemy | Python

May, 2022 – August, 2022

- Complete python course with Udemy

IBM | AI Chatbots without programming

March, 2021 – April, 2021

- Create an Instance of Watson Assistant
- Create Dialog Skills and Intents
- Implement the Dialog
- Deploy

Udemy | React & Angular

Ferbruary, 2021 – March, 2021

- Making a to-do list (draggable)

IBM | Blockchain Developer
Explore Award

December, 2018 – May, 2020

- This individual has demonstrated an understanding of topics such as shared ledger, smart contracts, consensus, Docker Business network, and architecture of blockchain solution.

IBM | Predictive Analytics Modeler
Explore Award

December, 2018 – May, 2020

- This individual has demonstrated an understanding of topics such as data preparation, data mining, data collection & integration, nodes & streams, deriving & reclassifying fields,

IBM | Security Intelligence Engineer
Explore Award

December, 2018 – May, 2020

- This individual has demonstrated an understanding of topics such as investigating offenses identified from events and flows, provide threat detection, using IBM QRadar SIEM, monitor policy compliance, vulnerability Data, Security vulnerabilities, SIEM Reports, and create operational rules.

IBM | Application of Security Engineer
Explore Award

January, 2017 – May, 2019

- This individual has demonstrated an understanding of topics such as OWASP web application security standards, SQL injection flaws, authentication, cross-site scripting, sensitive data exposure, security testing, session hijacking, SDLC, and Glass box scanning.
-

PROJECT

Web Portfolio | [Link](#)

- A Simple Portfolio Resume.
- Feature: Responsive, Smooth, Scrolling, Dark Mode.

Role: Developer | Tech Stack: HTML, CSS, JavaScript.

Live Weather App | [Link](#)

- This Web App provides users with real-time weather information, forecasts, and other weather-related data.
- It allows users to input a specific Name of Country, state, city, etc. and in response, provides them with the current weather conditions for that time.

Bluetooth Controlled Portable Mobile Solar Charger in DIT University

- Bluetooth Controlled Portable Mobile Solar Charger in
 - DIT University
 - BLUETOOTH CONTROLLED PORTABLE MOBILE SOLAR CHARGER is an idea that makes use of IOT devices and Android applications for using solar energy to charge our devices. For this, the basic idea is to create a device that will use solar energy and convert that energy to charge our devices.
 - The device also has two USB ports.
 - Between this a Bluetooth module will help in the instructions used for switching ON & OFF the device charging.
-
