Mobile No:- +91 8576840163

LinkedIn:- www.linkedin.com/in/shailendra63

OBJECTIVE:-

To secure a challenging position as a Java Developer, where I can leverage my strong foundation in core Java concepts and problem-solving skills to contribute to innovative software solutions. I am eager to learn and grow within a dynamic team, applying my knowledge to develop efficient and reliable applications.

ACADEMIC QUALIFICATIONS :-

- Matriculation passed from U.P. Board in 2016 with 84.50%.
- Intermediate passed from U.P. Board in 2018 with 79.60%.
- B.Tech in Electronics and Communication Engineering from IET, Ayodhya in 2023 with CGPA 8.2.

KEY SKILLS:-

- Good Knowledge on Java Development Environment Setup with Eclipse IDE.
- Good knowledge on Java programming language elements like data types, variables, operators, numbers, strings, control flow, etc.
- Good knowledge of object-oriented programming principles like inheritance, polymorphism, abstraction, and encapsulation.
- Good knowledge of SQL/Relational database is like PostgreSQL.
- Ability to learn new technologies with minimal time period

SOFTWARE SKILLS:-

Core Java (J2SE), Advance Java (J2EE), JDBC, Servlets, JSP, Collection Framework, Hibernate, Spring Framework, SpringBoot, HTML, PostgreSQL and etc.

ACHIEVEMENTS:-

- Summer research internship with JP Morgan on Cyber Security Virtually.
- Participated in college and school level Essay competition and received applauds.
- Event organizer in school annual day functions and other technical events.
- I have done a course of Core and Advanced Java from Ducat Institute, Noida.

PROJECTS

IoT-Based Auto Parking System

An IoT-based auto parking system is a smart solution that leverages the power of the Internet of Things (IoT) to efficiently manage parking spaces.

The aim of an IoT-based auto parking system is to optimize parking space utilization, reduce traffic congestion, and provide a convenient parking experience for drivers by leveraging IoT technology to monitor and manage parking spaces in real-time.

Online Doctor Consultation Application: A Digital Healthcare Solution

Technologies Used: Java, SpringBoot, Hibernate, PostgreSQL, HTML, CSS

This online doctor consultation project is built on Java and Spring Boot. It leverages several modules and user interfaces (UIs) for functionalities like registration, login, and password recovery. These modules are developed utilizing core Java features and Spring Boot functionalities, along with build tools like Maven.

A PostgreSQL database, managed by the Hibernate ORM framework, underpins the project's data storage and retrieval operations.

The aims to provide remote healthcare services, enabling patients to consult with doctors virtually. This digital solution bridges geographical gaps improves accessibility to healthcare, and offers convenience for both patients and healthcare providers.
