Portfolio

EXPERIENCE

Trainee Developer

Dec 2023 - oct 2024

NetLeap IT Training and Solutions

- As a Trainee Developer, I worked with senior developers on Python-based applications, writing clean and efficient code. I participated in code reviews, debugged software issues, optimized database queries, and managed data storage. I continuously learned new technologies to improve my skills and contributed effectively as a team player with strong communication and adaptability.

INTERNSHIP

Intern

Feb 2023 - Mar 2023

ESDS Software Solution Limited

- Acquired expertise in data science, cloud computing, cyber security, and HR operations, including talent acquisition.

PROJECT

VivekSparsh Blogging Platform

- Led the creation of VivekSparsh, a user-driven blogging platform enabling content creation, sharing, and discovery. Implemented features include intuitive blog creation, display of latest five blogs, and efficient content management for seamless moderation.

Collaborative Portfolio Website

- Developed a collaborative portfolio website for two individuals, showcasing their combined expertise, projects, and achievements. Integrated sections for resumes, project showcases, skills, and contact information to enhance online visibility and collaboration opportunities.

PieExpress

- Created PieExpress, a user-friendly e-commerce application for pizza delivery, featuring a seamless ordering system, real-time order tracking, customizable pizza options, secure payment gateway integration, and a robust backend for managing inventory and deliveries efficiently.

AgriOptimize: Plant Disease Detection, Crop Recommendation, and Soil Fertilization

- Developed AgriOptimize, an intelligent web application for plant disease detection, crop recommendation, and soil fertilization, utilizing machine learning and data analysis to enhance agricultural productivity and sustainability.

Code Exchanger

- Code Exchanger is an innovative code conversion tool designed to seamlessly translate code from one programming language to another while preserving the original logic and structure. This project emerged from the necessity to bridge the gap between disparate programming languages, enabling developers to transition between platforms without sacrificing code integrity.

E-commerce Jewellery Website

- Creating an e-commerce platform for jewellery using Django, focusing on functionalities like product cataloging, secure payments, user authentication, order tracking, and intuitive browsing and purchasing interfaces.

FaceTrack Attendance System

- Utilizes facial recognition technology to automate attendance tracking, replacing traditional methods like paper registers or swipe cards. By capturing and analyzing facial features, the system records attendance data, offering a more efficient and accurate solution for schools, offices, and events.

AcademEase Student Management Platform

- Developed using Django, AcademEase offers role-based login, streamlining student management with tailored functionalities for administrators, teachers, and students, ensuring secure access and efficiency.

Library Management System

- The Library Management System is a Django-based web application designed to automate library operations such as book cataloging, member management, borrowing and returns tracking, and report generation. It offers an intuitive interface for efficient resource management by librarians and staff.

Automatic Number Plate Detection for Toll Plazas

- Implemented a Python-based system leveraging computer vision techniques to automate the identification and capture of vehicle number plates at toll plazas. Enhances toll collection processes by accurately detecting and recognizing number plates from images or video streams.

Virtual Assistant using Python

- Spearheaded the development of a Python-based personal assistant application employing advanced Natural Language Processing (NLP) and diverse APIs. Tasked with automating routine activities, answering inquiries, disseminating information, and executing commands in response to user input. Enhanced user experience with a 70% increase in task completion efficiency.

TECHNICAL SKILLS

Languages: Python, MySQL, HTML, CSS

Technologies/Frameworks: Bootstrap, Django

Developer Tools: VS Code, jupyter-Notebook, GitHub, Google colab

Data Science : data Analysis, Data Visualization

Other: REST API

CERTIFICATIONS

- Backend Web Development - Technical Coding Research Innovation

EDUCATION

B.E- Artificial Intelligence & Data Science

2021-2024

Matoshri College Of Engineering & Research Centre, Nashik

Nashik, Maharashtra

Diploma-

2021

Matoshri aasarabai polytechnic Eklahare

Nashik, Maharashtra

Senior Secondary (XII)

2019

Maharashtra State Board of Higher Education

Nashik, Maharashtra

Secondary (X)

2017

Maharashtra State Board of Higher Education
