PROFESSIONAL SUMMARY

Detail-oriented Backend Software Engineer with extensive experience in developing and optimizing server-side applications. Proficient in Node.js, with strong expertise in designing and implementing RESTful APIs and managing databases using Sequelize and MongoDB. Skilled in enhancing performance, ensuring application security, and integrating third-party services to deliver seamless user experiences. Experienced in working with Agile teams and contributing to the delivery of scalable and maintainable software solutions.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript.
- **Frameworks:** Node.js, Express.js.
- **Databases:** MongoDB, Mongoose, MySQL, SQL, Sequelize
- **Version Control:** Git, GitHub.
- **Cloud Services:** AWS, Prometheus, Firebase
- **Tools:** Jira, Postman, FileZilla, Git, Jenkins

WORK EXPERIENCE

Software Engineer | LMS Solutions (India) Pvt. Ltd | Indore(M.P)

Oct 2023 - Present

- Designed, implemented, and optimized server-side applications using Node.js and Express.js.
- Developed and maintained robust backend systems for LMS software, ensuring scalability and reliability.
- Managed databases with MongoDB, MySQL, and PostgreSQL to support dynamic application requirements.
- Utilized AWS services for cloud-based solutions and performance optimization.

Jr software developer | Bytecipher private limited | Indore(M.P)

Feb 2022 - Aug 2023

- Collaborated with a cross-functional team to develop and maintain backend systems.
- Built and optimized server-side applications using Node.js and Express.js.
- Managed and integrated databases including MongoDB, MySQL, and PostgreSQL.
- Contributed to delivering scalable and efficient solutions for diverse client requirements.

MERN stack internship | Aprtron solutions | Noida(U.P)

Aug 2021 - Dec 2021

- Enrolled in a MERN stack development program to enhance full-stack development skills.
- Developed clean, functional code for both frontend and backend applications.
- Ensured timely completion of assigned tasks while maintaining high-quality standards.

PROJECTS

Twingalaxies:- Twin Galaxies is a gaming platform where gamers from all over the world play games and submit their respective scores for each game. Other players or gamers can then vote on these performances to validate their authenticity

Roles and responsibilities :-

- Developed and maintained server-side applications using Node.js and Express.js.
- Managed databases with SQL for efficient data storage and retrieval.
- Created and tested APIs using Postman and documented them with Swagger.
- Deployed and monitored applications on AWS for scalability and performance.
- Collaborated using Git for version control and streamlined development workflows.
- Implemented functionality and optimized performance using JavaScript.

PROJECTS

M-assets:- This project based on managing the assets of an company where employees need to install this app to use the assets of that particular company.

Technology used-Nodejs, PostgreSQL, sequelize expressJs, javascript, postman, swagger

Roles and responsibilities :-

- Developed and maintained server-side applications using Node.js and Express.js.
- Managed databases with SQL for efficient data storage and retrieval.
- Created and tested APIs using Postman and documented them with Swagger.
- Deployed and monitored applications on AWS for scalability and performance.
- Collaborated using Git for version control and streamlined development workflows.
- Implemented functionality and optimized performance using JavaScript.

PostYourStuff:- This project works like an e-commerce website where you can buy something or can also able to sell your products.

Technology used-Nodejs, mongoDb, mongoose, expressJs, javascript, postman

TiresKicked:-This project is based on vehicle inspection where the customer book an appointment and based on the availability particular date time and inspector allotted for that vehicle.

Technology used-Nodejs, mongoDb, mongoose, expressJs, javascript, postman , swagger

Roles and responsibilities :-

- Developed and maintained RESTful APIs using Node.js and Express.js to ensure smooth communication between the frontend and backend services.
- Designed and implemented database schemas using PostgreSQL and MongoDB, leveraging Sequelize and Mongoose ORM for efficient data operations.
- Created and integrated API documentation using Swagger and Postman for effective collaboration with frontend developers and QA teams.
- Used Git for version control and collaborated on projects through code reviews and pull requests in GitHub

EDUCATION

Masters of computer Application

Jul 2018 - May 2020

Medicaps University | Indore

Bachelors of Computer Application

Jul 2015 - May 2018

Medicaps University | Indore
