

KUSHAGRA GUPTA

DEVOPS ENGINEER

+91-7905566243 | kushagragupta.devops@gmail.com | Lucknow, India | kushagra-g9 | kushagra-gupta- | portfolio

CAREER SUMMARY

- Enthusiastic DevOps Engineer with one-year hands-on experience in CI/CD, containerization, and AWS cloud infrastructure.
- Proficient in tools like Jenkins, Terraform, Docker, Kubernetes, and monitoring stacks (Prometheus, Grafana).
- Passionate about GitOps, IaC, and automating secure software delivery through DevSecOps practices.
- Eager to contribute to a collaborative DevOps team and deliver scalable, secure, and high-performing applications.

TECHNICAL SKILLS

- DevOps Tools:** Jenkins, Linux, Docker, Kubernetes, Terraform, Ansible, Git/GitHub, Prometheus, Grafana, GitHub Actions, Argo CD, SonarQube, Nginx, Helm
- Cloud Platforms:** AWS (EC2, S3, IAM, VPC, RDS, CloudWatch, Lambda, EKS, AWS CI/CD), Azure (Basics)
- Scripting & Languages:** Bash, Shell, YAML, Python, JavaScript (Basic)
- Security Tools/Practices:** IAM (AWS), Secret Management, basic CI/CD security scans (SonarQube, Trivy)
- Web Stack (Basic):** HTML, CSS, React.js, Node.js

EDUCATION

- Galgotias College of Engineering and Technology**, Greater Noida, India | 2022 – 2024 | *Master of Computer Applications*
- Integral University**, Lucknow, India | 2019 – 2022 | *Bachelor of Computer Applications*

DEVOPS HANDS-ON PROJECTS GITHUB REPOS

1. End-to-End DevSecOps CI/CD Pipeline Implementation [GitHub Repo](#)

- Designed and implemented a secure, automated CI/CD pipeline for a Java-based application using Jenkins and GitHub as the source code manager.
- Configured **Jenkins** for automated build, test, and deployment stages to streamline software delivery.
- Integrated **SonarQube** for static code analysis, improving code quality by 30%.
- Used **Trivy** to scan Docker images, reducing container vulnerabilities by 40% before deployment.
- Containerized the application using **Docker** and pushed images to Docker Hub.
- Deployed to Kubernetes using **Argo CD with GitOps** workflow for version-controlled, declarative delivery.
- Enabled **Argo CD Image Updater** to automatically detect new Docker image versions and trigger Git-based deployments, ensuring hands-free, continuous delivery.
- Implemented **real-time monitoring** using **Prometheus and Grafana** for application and infrastructure metrics.
- Achieved 25% reduction in deployment time while improving security and operational reliability.

2. Three-tier Application Deployment on AWS EKS [GitHub Repo](#)

- Architected and deployed a scalable three-tier application on **AWS EKS**, containerizing components with Docker and orchestrating with Kubernetes to enhance deployment efficiency.
- Configured **AWS ALB Ingress** for secure external access and Persistent Volumes for database storage.
- Implemented **autoscaling** with HPA and enforced network security between tiers.
- Enhanced application scalability, supporting a 50% increase in user traffic without performance degradation.
- Cloud-Native Expertise: Gained hands-on experience in Kubernetes and cloud infrastructure management, reinforcing production-level deployment skills.

SOFT SKILLS

- Strong problem-solving and troubleshooting skills.
- Effective communication and collaboration in agile environments.
- Quick learner with a passion for automation and optimization.
- Adaptable and eager to learn new technologies.
