RELEVANT PROJECT WORK

Detection of air pollution in vehicles using Iot

- This project aims to detect the Carbon monoxide levels emitted by a vehicle using sensors.
- Whenever the carbon monoxide level rises above the limit the user is prompted an alert.

Tic-Tac-Toe Game using C

- The Tic-Tac-Toe game is played on a 3X3 grid. It is a two player game.
- The aim is to make a horizontal, vertical or diagonal sequence of three marks. Whoever makes it first wins.

Encryption text using C

- In this project a readable message is converted to an unreadable form to prevent unauthorized parties from reading it.
- This project aims to increase the security and end to end encryption of messages and data
