

ADITYA YADAV

Android Developer

+91 6392050139 | devoaditya7@gmail.com | Noida

SUMMARY

I am a dedicated Android app developer with a strong foundation in Kotlin and a solid understanding of MVVM architecture. My technical expertise encompasses C, C++, Java, and OOP concepts, alongside a thorough knowledge of SQL. I am proficient in using a variety of tools and libraries such as Firebase, Room DB, Retrofit, Volley, and Coil to build robust and scalable mobile applications.

SKILLS

Tools

ANDROID STUDIO	VS CODE	GITHUB	POSTMAN
----------------	---------	--------	---------

Programming Languages

JAVA	KOTLIN	XML	C	C++	SQL
------	--------	-----	---	-----	-----

Databases

FIREBASE	ROOMDB	SQL LITE
----------	--------	----------

Libraries

RETROFIT	ROOM	EXOPLAYER	ML KIT	GLIDE	COIL
----------	------	-----------	--------	-------	------

ARCHITECTURES

MVC	MVVM

Additional Skills

HTML CSS JAVASCRIPT

PROJECTS

A- Kart [Morder E-Commerce Application]

Description: - Developed a modern eCommerce Android application using Kotlin and XML . Created an admin panel for product management and backend operations.

- Technologies:** Kotlin, XML, Firebase (Authentication and Firestore Database), Coil (Image Loading), Razorpay (Payment Integration)
- Key Achievements:** Implemented MVVM architecture for efficient data management and separation of concerns. Designed and developed user interfaces using XML for the eCommerce app and admin panel. Integrated Firebase for user authentication and realtime product data management. Utilized Coil for optimized image loading and caching. Integrated Razorpay for seamless payment processing.

LOOK MY WORK [Household Service Application]

Description: Developed an Android application to connect users with household service providers, facilitating booking and management of services.

- Technologies:** Kotlin, XML, Firebase (Authentication, Firestore, Firebase Storage Database), ZegoCloud (Chat Integration), Google Sign-In
- Achievements:** Developed user-friendly interfaces using Kotlin and XML, ensuring intuitive navigation and service booking. Implemented secure authentication mechanisms via Firebase, ensuring data privacy and user authentication. Integrated ZegoCloud for realtime chat capabilities, enhancing user-provider communication and service management.

My Project Lists:

These Are My Project -

- Gita App- MVVM App
- Chat App
- Music and Video Strimling
- NOTE App -MVVM
- Human Face Rader
- Quiz App
-
