Key Skills

Core Java Spring Boot
Hibernate / Jpa
Microservices JDBC
AWS Restful Web
JSP Servlets React.js
Node.js MongoDB
MySQL Github
HTML and CSS Javascript
Tomcat Server

Technical Skills

Java Spring MVC JDBC
Spring Security JWT
Html/Css Javascript
AWS Debugging
Troubleshooting
Agile Methodology SQL

Personal Information

Date of Birth 10th October 2001
Gender Male

About Me

Java Developer seeking roles in Core Java, AWS, Spring Boot, Hibernate/JPA, Web services, RESTful API, Microservices, SQL, Servlets, Spring security, JWT, JSP, React.js, Node.js, Swagger, Agile development, debugging and troubleshooting.

Profile Summary

As an API developer with 1.6 years of experience in implementing robust software solutions using Java, Spring Boot, Hibernate, security frameworks, JSP, and JSTL. Passionate about leveraging my technical acumen to contribute to the development of the innovative solutions like eExam Pro.

Education

2023, Full Time

B.Tech/B.E., Computers

Babasaheb Bhimrao Ambedkar University (BBAU), Lucknow , 80%

2019

12th, CBSE, English, 65-69.9%

2017

10th, CBSE, English, 75-79.9%

Work Experience

2022 - Present

Java Developer

Briston Infotech Pvt Ltd.

Key Result Area

- Developing and implementing RESTful web services using Spring Boot, which involved creating controllers, entity, payload and repositories.
- Ensuring the security of API endpoints by implementing authentication and authorization using Spring Security, along with JWT tokens.
- Developing and maintaining the REST controller layer, responsible for handling incoming HTTP requests and returning appropriate responses.

Reading

Yoga

- Utilizing AWS services such as EC2, S3, and RDS to deploy and manage the API in a scalable and secure environment.
- Conducting thorough testing of the API endpoints in Postman to verify that they meet the requirements.
- Using Swagger to design, document, and test API endpoints to ensure clarity, consistency and compatibility with other systems and users.
- Configuring and maintaining the MySQL database to ensure optimal performance and data consistency.
- Integrating Hibernate JPA with the repository layer to improve database performance and simplify data access.

Projects

18 Months

eExam Pro

- The eExam Pro is an innovative software solution developed to enhance the security and efficiency of online examinations.
- This system incorporates advanced security features such as multi-factor authentication, encryption, and biometric verification, ensuring the integrity and authenticity of the examination process.
- Increased Productivity by 30% using TPM concepts; reduced rejection from 32% to 8% using root cause analysis and increased Profit margin by 3X

6 Months

Tindog Website

- Built the application that provides a unique platform for customers to buy and review dogs.
- Customers can filter their search by location, breed, age and find the perfect dog.
- Technology Used: HTML/CSS, Bootstrap, JavaScript, MongoDB, React.js, Node.js and GitHub.
