SUMMARY

I'm a third-year B.Tech (CSE - AIML) student with hands-on experience as a trainee in Machine Learning, Data Analysis, and Web Development. I'm a quick learner with strong problem-solving skills, passionate about building efficient solutions and contributing effectively in collaborative environments.

PROJECTS

HopeAI

HopeAI is an emotionally intelligent chatbot focused on stress relief and emotional well-being. It offers mood tracking, and personalized coping strategies through empathetic AI interactions. Designed with privacy and accessibility in mind, HopeAI empowers users—especially students—to manage their mental health more effectively.

LUFY AI Summarizer

Lufy is an AI-powered legal assistant designed to make complex law documents easier to understand. Built using Python, it leverages machine learning to summarize legal texts into simple, accessible language. Lufy aims to bridge the gap between legal professionals and the public by simplifying legal information through intelligent automation.
