MERN STACK AND REACT NATIVE

Dunitech Soft Solution Pvt Ltd

December 2023- Present

- At Dunitech Soft Solution Pvt. Ltd., I spearheaded the development of two advanced staking platforms — Staking Platform 1 and Staking Platform 2 — for our clients, utilizing cutting-edge technologies such as React.js, Tailwind CSS, Google Material Design, Blockchain, and Web3..
- I independently led the Staking Platform 1 project, delivering a robust and secure solution that aligned with client requirements and adhered to industry best practices. For Staking Platform 2, I directed both the design and implementation phases, ensuring a seamless user experience and strong security through deep blockchain integration. Throughout the development cycle, I collaborated closely with cross-functional teams to effectively translate client needs into scalable, maintainable software solutions. Post-deployment, I have continued to monitor, optimize, and enhance the platforms to integrate emerging technologies — improving both operational efficiency and end-user satisfaction.
