## EDUCATION

|                                                                                  |              |
|----------------------------------------------------------------------------------|--------------|
| <b>Pranveer Singh Institute of Technology, B.Tech. in Information Technology</b> | 2021-Present |
| <b>Doon International School, Kanpur, 12th</b>                                   | 2020         |
| <b>Doon International School, Kanpur, 10th</b>                                   | 2018         |

**Awards:** Consistent Student Full Attendance(5x), Best Defender Award in VolleyBall.

## WORK EXPERIENCE

**Infosys Springboard Internship, Artificial intelligence** Feb 2025 - Mar 2025

- Developed an AI-powered tool using Python and Flask to generate alt-text for images, improving accessibility for visually impaired users.
- Managed API keys and sensitive data using environment variables (.env) to ensure secure development practices.
- Integrated the Gemini AI API to enhance image analysis and provide accurate medical insights, addressing a 15-30% misdiagnosis rate in AI-powered systems.

## SKILLS

**Languages :** Java, C, Python, HTML/CSS, SQL(Basic).

**Technologies :** React, Hosting , DataBase Management System, Git/Github, VS code, Wordpress.

**Soft Skills :** Consistent, TeamWork, Communication, Leadership.

**Certifications :** Web Developer Bootcamp (Udemy), Young Professional (TCS iON Career Edge) Data Structures and Algorithms using Python from **INFOSYS Springboard**

## PROJECTS

**Underwater Image Enhancement – Machine Learning ,Python** May 2024

- **Applied Unsharp Masking Technique:** Improved visibility of underwater objects by sharpening image details, resulting in a 35% increase in object detection accuracy.
- **Implemented Principal Component Analysis (PCA) Fusion:** Combined multiple images to enhance clarity and detail in underwater photographs, leading to a 40% improvement in image quality.
- Enhanced overall image quality and visibility, making underwater images 50% more suitable for analysis and interpretation.

**Portfolio Website HTML/CSS , React, JS** Jan 2024

- Made a 90% responsive Personal Portfolio Website.
- Learned about the 5+ technologies and work with them.

**Suicide Detection System - Machine Learning ,Python** Jun 2023

- Developed a Natural Language Processing (NLP)-based Suicide Detection System to analyze user-generated text for early detection of suicidal ideation.
- The program cleans the data, creates a meaningful words, finds suitable hyperparameters, and predicts if the user is suicidal or not using Naive Bayes. If classified as suicidal, it provide the National Suicide Prevention Lifeline number, which can be crucial in saving lives.

## ACHIEVEMENTS

Runner-Up of PSIT TechExpo (Project-thon) 2022.

5-star at **HACKERRANK in Python** and **4-star at HACKERRANK in C**.

Completed a Course of Foundation of Cyber-Security from Coursera

**Earned Python Basic and Intermediate Certifications** from HackerRank.

Team Captain - Ranjeet House Volleyball

Solved SQL 50 Questions on **LeetCode**

Solved 100+ Coding ques. In various coding Platform.

Worked as a Co-head of a College-level Event (**IGNITIA-2k23**).
