

PRADYUMNA TIWARI

Full-Stack Developer

Mobile: +91 9919745448

Email: pradyumna.rp.tiwari@gmail.com

OBJECTIVE

Strong combination of technical and analytical skills to contribute towards product development and meet client deliverables. Ambitious to advance my career with a globally recognized organization that will give me global exposure to enhance my skills and knowledge for the mutual benefit of the organization.

PROFESSIONAL SUMMARY

- A qualified engineering professional with a total of **2.3 years** of rich experience in the **IT industry**, focusing on **full-stack development**.
- Good understanding of **object-oriented programming (OOP)** using **C#**.
- Good exposure to web development using **ASP.NET MVC**, **ASP.NET Core MVC**, **Web API** and **Entity Framework**, **Dapper**, **LINQ** etc.
- Experience with **SQL Server**, including writing complex **SQL queries** and **stored procedures**.
- Good understanding of **HTML5**, **CSS**, **jQuery**, **AJAX**, **Angular 17** and **JSON**.
- Good **troubleshooting**, **debugging** and **problem-solving** skills.

SKILLS SUMMARY

- **Languages:** C#, JavaScript, TypeScript
- **.NET Technologies:** ASP.NET Core MVC, ASP.NET MVC, Web API, Dapper, Entity Framework, LINQ
- **Front-End:** Angular 17, jQuery, HTML, CSS, Bootstrap, Angular Material
- **Databases:** SQL Server (queries, stored procedures, indexing)
- **Version Control:** Git
- **Tools/IDEs:** JIRA, VS Code, Visual Studio

WORK EXPERIENCE

SRMTECHSOL (STPL), Lucknow, INDIA

Full-Stack Developer | Jan 2023 – Present

- Worked with project team architects, delivery managers, and project managers to ensure consistency in estimating and understanding requirements.
- Executed test scripts/scenarios to verify that the application functionality operates and performs successfully according to the approved Requirements and System Design.
- Worked with the application team to resolve issues identified during the testing process.

EDUCATION

- **B. Tech, Computer Science | 2024**
Seth Vishambhar Nath Institute of Technology
- **Intermediate | 2019**
Rashtriya Inter College
- **High School | 2017**
Prakash Inter College

PROJECTS

SRM TECH SOL (STPL)

StickySurveys

Role: Full-Stack Developer

Team Size: 6

Client: stikkysurveys.com (USA)

Technologies: C#, Web API, Angular, Dapper, Entity Framework Core, SQL Server, Git etc.

Project Overview:

StickySurveys is a customer-specific asset management platform designed to handle maintenance and service tasks for multiple asset types, including ATMs. Each customer has a dedicated project structure tailored to their unique assets, managed by the customer's admin. Super admins oversee all projects across customers, ensuring consistency and compliance.

The service process includes assigning technicians to specific assets based on customer requests. Technicians inspect assets, document conditions, report repair needs, and upload relevant images. Project managers review these reports to determine billing eligibility, which informs both payroll and customer invoicing.

SRM TECH SOL (STPL)

StickyData

—

Role: Full-Stack Developer

Team Size: 8

Client: stickydata.com (USA)

Technologies: C#, ASP.NET MVC, Entity Framework, Web API, jQuery, SQL Server etc.

Project Overview:

StickyData is a service management platform for ATM Center maintenance, supporting banks with scheduled services (monthly, quarterly, yearly). When a service order is created, a technician near the ATM Center is assigned to complete the task. On the scheduled date, the technician inspects the ATM, documents conditions, reports repairs if needed, and uploads images. Project managers review the survey to determine billable or non-billable status, which influences payroll and invoicing. StickyData simplifies scheduling, documentation, and billing, ensuring efficient ATM maintenance for customers.

SAM INFRATECH (SIPL)

Inventory Management System

Role: Full-Stack Intern

Duration: 5 Months

Technologies: C#, ASP.NET MVC, Entity Framework, Web API, jQuery, SQL Server etc.

Project Overview:

Built a web-based inventory management system to streamline item tracking, stock updates, and user-role-based access. The system featured CRUD operations, automated restock alerts, and dynamic reporting modules. This internship provided practical exposure to full-stack development, database handling, and collaborative coding using Git.
