Education

Indian Institute of Engineering Science and Technology, Shibpur
Bachelor of Information technology (GPA: 8.14 / 10.0)

Expected May 2025
Howrah, West Bengal

Experience

Web Prism Dynamics

May 2024 – August 2024

Front-End Developer

Kolkata, West Bengal

- Developed and maintained responsive and modern web pages using React.js and custom CSS, ensuring a sleek and user-friendly interface.
- Collaborated closely with backend teams to integrate RESTful APIs, enhancing the overall functionality and responsiveness of the application.
- Designed and implemented interactive UI components, increasing user engagement by 20% through a modern and intuitive user experience.
- Optimized front-end code by refactoring and utilizing modern React hooks, reducing load times by 15% and boosting application performance.

Projects

Khosla Electronics Website (Internship Project) | React.js, Node.js, Custom CSS

- Led the front-end development of Khosla Electronics' modern e-commerce website during my internship at Web Prism Dynamics, delivering a premium and responsive user experience.
- Integrated dynamic product catalog and RESTful APIs, reducing server response time by 20% and improving page load speed.
- Collaborated with design and backend teams to ensure seamless navigation and optimized database queries.
- GitHub Repository: github.com/khosla-electronics-repo

Kicket Website (Internship Project) | React.js, Node.js, Custom CSS

- Developed a premium-looking website for a corporate client during my internship at Web Prism Dynamics, focusing on high-end UI/UX design using React.js and custom CSS.
- Implemented a responsive and interactive UI with animations and smooth transitions, improving user engagement by 25%.
- GitHub Repository: github.com/kicket-project-repo

Secure Examination Paper Distribution System (Odoor Hackathon Team Project) | Node.js, React.js, Encryption/Decryption

- Collaborated with a team to create a full-stack web application for securely distributing examination papers, where universities can register, login, and upload papers.
- Implemented encryption and decryption features to ensure that only authorized examiners can access and download papers with a provided key.
- GitHub Repository: github.com/secure-exam-system-repo

Technical Skills

Languages: C, C++, Javascript, python

Technologies: React.js, Express.js, TensorFlow, PyTorch, Bootstrap, Node.js, CSS

Concepts: Compiler, Operating System, Encryption, Decryption, Artificial Intelligence

Certifications & Achievements

Odoor Combat Hackathon – Top 150 Teams

July 2024

- Ranked in the top 150 teams globally for developing the Secure Examination Paper Distribution System during the Odoor Hackathon.

LeetCode 1200+ Problems Solved

May 2024

- Achieved a milestone by solving over 1200 competitive programming problems on LeetCode, demonstrating proficiency in Data Structures and Algorithms.
