Professional Summary

Full Stack Developer with 1+ year building scalable PHP/MySQL platforms for multi-tenant clients and delivering a first-time CRM that cut processing time by up to 80%; recently shipped two MERN projects with Redis caching, OAuth, and optimized APIs, serving 1500+ real users.

Skills

Mongo DB Express React Node JavaScript PHP Tailwind MySQL C++ Python
HTML CSS Bootstrap Git & GitHub JAVA

Experience

Full Stack Developer | TVS Solutions | Lucknow | 2024 – 2025

- Developed and scaled school/institute platforms in **PHP/MySQL**, supporting 1,500+ users across multi-tenant client sites with role isolation and SLA-backed reliability.
- Engineered user permission systems and **role-based access control** for within 10 days.
- Streamlined complex flows (admissions, fees, attendance) with clearer navigation and inline validation, used **error handling**, for reducing errors by ~40% and reducing average task time by ~35%.
- Implemented audit logs, recycle/restore flows, and daily backups, achieving **zero data-loss** incidents over 6 months while accelerating recovery from hours to minutes.
- Delivered 1st **company CRM**, consolidating data and workflows across departments, cutting processing time 80%, reducing errors, and reaching 90% adoption in 30 days.

Fronted Developer (Internship) | Funtex | Indore | 2024 (6 months)

- Solved JS **DOM-manipulations** to make tabs, modals, validations etc., for 250+ pages in a week, lowering form errors by ~25%.
- Reduced JS duplication by modularizing components (**DRY Code**), cutting custom script size by ~20% and speeding new page builds from ~1.5 days to ~1 day per template.

Projects

Absolute Cinema (React JS, Node JS, Express JS, Redis, OAuth, 3rd Party API)

GitHub Repo

- Designed a user flow that surfaces curated picks within 3–5 minutes using filters, search, and similar-title suggestions, improving first-session discoverability for new users.
- Built a full-stack MERN platform with **Express APIs** and **React UI**, integrating **Third Party API** TMDB data, responsive Tailwind UI, and reusable component patterns for filters, search, and detail views, improving page interactivity and navigation depth.
- Implemented **Redis-backed** caching for high-traffic TMDB endpoints (genres, discover, search), cutting median API latency by 40–70% and reducing third-party call volume $\geq 50\%$, with cache key design.
- Designed **MongoDB schemas** and **REST** endpoints for several fields, added validation and **error handling** that lowered error occurrence by ~25%.

Education

- **B. Tech - Computer Science** | Vellore Institute of Technology, Bhopal | 2020 – 2024
- **Intermediate** | Apeejay School, Faridabad | 2020
- **High School** | ST. THOMAS SR SEC SCHOOL, Faridabad | 2018
