Higher Secondary - Percentage - 89.3%

Lucknow, India

Experience

Upstart Labs

April 2023 – July 2023

Web Developer Intern

Bengaluru, India

- Completed an internship at Upstart Labs, gaining practical experience in live web development projects. Worked with industry leaders, enhancing technical skills and learning valuable insights.
- Managed websites for various companies, ensuring functionality and optimizing user experience. Interacted with clients to gather requirements and provide timely updates and support.
- Developed strong communication and project coordination abilities through regular team meetings and presentations.

Zephyr Technologies and Solutions

July 2022 – August 2022

Web Developer Intern

Mangaluru, India

- Played a crucial role in the front-end development of a website that allows students to apply for internships in multiple domains, improving the user experience and overall functionality of the site.
- Encouraged Collaboration and teamwork among team members to promote a culture of continuous improvement and innovation.

Projects

Content Based Recommendation System

November 2022 - February 2023

- A Content-Based Movie Recommendation System which focuses on a recommendation engine that filters the data using algorithms and recommends the most relevant items to users.
- This recommender system first captures the past behaviour of a user and based on that, recommends content which the users might be interested in.
- This helps the user to save time browsing the internet looking for movies from the thousand already existing ones.

Sorting Visualizer

May 2022 - June 2022

- Created an interactive web application that visually demonstrates sorting algorithms.
- Users can control the parameters of the visualizer, including the size of the data sets and the speed of the sorting operation.

MeetUp Application

November 2021 - January 2022

- An application where users find people with similar interest. The application functions as a fantastic platform for forming communities, based on interest.
- Application with a Java-based front-end utilising XML for layout and design, and Firebase for back-end services.

Technical Skills

Languages: C/C++, XML, HTML, CSS, JavaScript, SQL

Developer Tools: VS Code, Eclipse, Microsoft SQL Server, Android Studio, WordPress

Other

Certifications: C++ Programming Beginner to Advanced (Udemy), The Complete Android Developer Course (Udemy).

Accomplishments: Solved 200+ DSA questions on all online coding platforms combined.

Extra Curricular: Served as a Technical Content Writer for the team at 'CODEMANIA'.
