EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech. (CSE)	Abdul Kalam Technical University, Uttar Pradesh	8.17	2019-2023

EXPERIENCE

- Growtele Communication** March 2025 - Present
Software Engineer Noida, India
 - Engineered and integrated **CRM solutions** with **MoEngage, WebEngage, and CleverTap**, boosting lead conversion by **50%**.
 - Led the **system design and development** of an **AI-powered chatbot** using **Node.js, Socket.io, Express.js, React.js, and Dialogflow**, with workflows for intent recognition, **API integration**, and fallback handling, automating **60%** of customer queries.
 - Optimized backend architecture with **MongoDB and Redis Caching, RabbitMQ**, managing **10k+** records and improving query performance by **35%**.
 - Deployed scalable **SaaS applications** on **AWS EC2** with Linux-based environments, implementing **CI/CD** pipelines that reduced release cycles by **40%**.
- Metageeks Technologies** jan 2024 - Feb. 2025
Full Stack Developer Noida, India
 - Developed a **CRM-Incorporated blockchain platform** using **Next.js, Node.js, and Solidity**, enabling secure property transactions and syncing customer data with CRM for real-time tracking.
 - Built a **cross-platform mobile app** in **React Native** Coordinated with the same CRM and blockchain workflows, increasing customer engagement by **30%**.
 - Designed system architecture for wallet integration, smart contract execution, and **secure APIs**, reducing manual verification efforts by **40%**.
 - Improved **page load** speed by **35%** using **SSR/ISR** and Migrated scalable apps on **AWS Lambda**.

PROJECTS

- Pulse Chat** April 2025
A real-time chatting application that allows users to send messages, receive instant notifications. Live Url | Github
 - Tools & technologies used:** Next.js, TypeScript, Node.js, MongoDB, Redis, RabbitMQ, AWS.
 - Optimized message delivery with **Redis caching and RabbitMQ queues**, achieving **<200ms** latency and **59.9%** uptime.
 - Designed **microservices architecture** and **system design** for scalability and maintainability across modules.
 - Orchestrated** the application on **AWS using Docker**, ensuring high availability, **Security**, and **fault tolerance**.
- AI Take Interview** March 2024
Constructed an AI-powered mock interview platform with real-time webcam/mic integration. Live Url | Github
 - Tools & Technologies used:** Nextjs, React, Clerk, Neondb, PostgresQL, Gemini, Vercel.
 - serving **50+** users per day with **AI-generated questions**, and instant feedback.
 - Enabled **50+** daily users to improve interview performance by **30%** on average through AI-driven scoring, **real-time feedback**, and **performance analytics** dashboards.

TECHNICAL SKILLS

- Programming:** C/C++, JavaScript, Python, SQL.
- Libraries/Frameworks:** Reactjs, Nextjs, Html/Css, React-Native, Nodejs, Typescript, Express, Django, Pandas.
- Cloud/Databases:** MongoDB, MySQL, Redis, AWS (EC2, Lambda, S3).
- Tools & Other:** Github, Docker, CI/CD, Kafka, Linux, VS Code, Postman, GraphQL, Microservices, REST APIs.

ACHIEVEMENTS

- Winner** – **AI/ML Hackathon** Produced an AI social media analyzer predicting trending posts with **50%** accuracy. 2023
- 2nd Place** – **College Tech Fest** Coordinated a coding challenge and quiz event, managing logistics. 2022

CERTIFICATIONS

- Generative AI Fundamentals – **Google Cloud**
- Introduction to Cybersecurity - **Cisco**
- Namaste React - **NamasteDev**
