Education

Dr. B.R. Ambedkar National Institute of Technology, Jalandhar

Nov 2022 – Present

Bachelor of Technology in Computer Science and Engineering

Gopal public school

April 2019 – May 2021

Senior Secondary

Technical Skills

- **Programming Languages:** C++, Python.
- **AI & LLM Tools:** ChatGPT, RAG, Prompt Engineering, Pinecone (Vector DB).
- **Web Technologies:** HTML/CSS, Java Script, React.js, Node.js, Express.js, RESTful API.
- **Databases:** MySQL, MongoDB.
- **Developer Tools:** Git, GitHub.
- **Courses:** Data Structure and Algorithms (DSA), Object Oriented Programming (OOPS), Database and Management System (DBMS).

Experience

A2IT (Academic Advancement of Information Technology), Mohali, Punjab Jun 2025 – Aug 2025

Full Stack Web Development Intern

- Worked with team members to understand project requirements and how the system should function.
- Helped improve system performance and workflow by analyzing data and identifying issues.
- Explained features and guided non-technical users to help them use the system easily.

Projects

HealthCompanion ChatBot | Python, LangChain, Flask, GPT, Pinecone

[GitHub](#)

- Developed a RAG-based healthcare chatbot trained on medical literature to provide accurate and context-aware health responses.
- Implemented retrieval-augmented generation using Pinecone vector database for efficient semantic search and top-k document retrieval.
- Built backend services using Flask and integrated LangChain for prompt chaining, conversation memory, and response generation.
- Designed conversational workflows handling 100+ user queries, supporting symptom-based questions and follow-up interactions.

Welding Service WebApp | React, Node.js, Express.js, MongoDB, JWT

[GitHub](#)

- Developed a full-stack **MERN-based Welding Service Web Application** enabling customers to book services, request custom fabrication, and track order status in real time.
- Designed and implemented secure **JWT-based authentication and role-based access control** (Admin/User) with protected routes and encrypted password storage.
- Built RESTful APIs using **Node.js and Express.js** and integrated **MongoDB** for efficient data modeling, order management, and service catalog handling.
- Created a responsive and dynamic frontend using **React.js**, featuring service listings, booking forms, dashboard analytics, and real-time UI updates.
- Implemented features such as **online service requests, booking management, status updates, and admin dashboard** to streamline operations and improve customer experience.

Achievements

- **Solved 250+ Problems** on LeetCode, GFG improving algorithmic problem-solving skills.
- Secured **98.46 percentile** in JEE Mains, demonstrating strong analytical and problem-solving abilities.
- Received **Certificate of Completion** from BE10X for successfully participating in an AI Tools Workshop.
- Awarded **Best Acting Award** in the Annual School Drama Competition for outstanding performance.
