PROFILE SUMMARY:

Motivated B. Tech final-year student with strong foundation in **Web Development (HTML, CSS, JavaScript)** and programming in **C/C++, SQL. Skilled in DBMS, OOPs, and DSA** with **(500days streak)** consistent daily problem-solving practice. Building **Full-stack + AI projects** integrated with Firebase & Google Authentication and **exploring REST API development. Quick learner, eager to adopt new technologies** according to requirements and contribute to real-world software solutions.

TECHNICAL SKILLS

- **Programming:** C++, Python, SQL
 - **Web Development:** HTML5, CSS3, JavaScript
 - **Databases:** MySQL
 - **Tools:** Git/GitHub, Postman, VS Code ,MS Office
 - **Core Computer Science:** Data Structures & Algorithms, DBMS, OOPs, Agile Development, SDLC
 - **Soft Skills:** Team Collaboration , Problem Solving, Communication Skills, Organization Skill ,Proactive
-

Experience:

Data Engineer Intern at Reliance Jio

April2025-June2025

Project: Developed a **Campaign Trend Analysis Model** using **Python, MySQL** to analyze customer recharge behavior and SMS campaign effectiveness for large-scale telecom data. Designed a dynamic Red–Yellow–Green engagement scoring model to classify customers based on recharge responsiveness and optimize campaign targeting. Built interactive dashboards and REST APIs to visualize customer insights, improve campaign performance, and reduce unnecessary SMS campaign costs.

AI-Powered Digital Twin EHV Substation | SIH 2025 Finalist (Team Project) [GitHub Code](#) [LiveLink](#)

- Developed a **real-time AI-powered** digital twin of a 440/220kV EHV substation using React, Tailwind, Node.js, and Firebase for live monitoring and visualization.
- Integrated **IoT sensor data** to power an interactive dashboard displaying critical electrical and operational parameters in real time.
- Implemented **AI-based predictive** maintenance with a smart recommendation engine to forecast faults and suggest proactive maintenance actions.
- Built an **AI chatbot assistant** for instant troubleshooting and operational support as part of a **Smart India Hackathon (SIH) finalist team project.**

Lehnga Bazar | Full Stack MERN + Payments + Admin Panel [GitHub Code](#) [Live Link](#)

- Built a **full-stack AI-powered e-commerce platform** using React, Tailwind CSS, Node.js, Express, and MongoDB
 - Implemented secure authentication using Firebase Google OAuth, JWT-based authorization, and **bcrypt password** hashing
 - Integrated **Razorpay payment** gateway with backend **HMAC-SHA256** signature verification to ensure secure transaction
 - Developed a protected admin dashboard for **product add, update, and delete functionality (CRUD OPERATION)**
 - Engineered an **AI-powered chatbot** for intelligent website navigation and **customer assistance**
-

EDUCATION

- B.Tech (CSE) — Gyan Ganga College of Technology (2022–2026) | CGPA: **8.32**
 - Intermediate (12th) — KL Inter College (UP Board) | 73% (2021–2022)
 - High School (10th) — KL Inter College (UP Board) | 76.83% (2019–2020)
-

CERTIFICATIONS

- **Salesforce CRM** :Trail Mix Course
 - TCS Last Mile Program — Smart Bridge
 - GFG **160 Days** Challenge
-

ACHIEVEMENTS

- **SIH 2025** Runner-Up, and Work As A **Team Lead** and Collaborated with Members
- 3× National Hackathon Winner + 2× Finalist
