PROFESSIONAL SUMMARY

MERN Stack Developer who cut API errors by 25–30%, as measured by Postman test logs, and boosted frontend load speed by 20% while building production-grade RESTful APIs, JWT-secured authentication systems, and real-time features with Socket.io. Focused on shipping fast, scalable, user-first web applications.

PROFESSIONAL EXPERIENCE

Web Developer — White Soft Info

February 2026 – Present

- Reduced API error rate by 25–30%, as measured by Postman test logs, by systematically debugging and testing RESTful endpoints built with Node.js and Express.js.
- Improved frontend load performance by 20%, as measured by page load benchmarks, by building reusable, optimized UI components in React.js.
- Secured 100+ concurrent user sessions with zero unauthorized access incidents, as measured by role-based access audits, by implementing JWT-based authentication with granular permission controls.
- Enabled reliable data retrieval across 1,000+ records, as measured by query response time, by designing efficient MongoDB schemas with Mongoose.
- Supported 200+ daily user interactions during QA cycles, as measured by test session logs, by developing and validating full-stack MERN features end-to-end.
- Handled a throughput of 50+ API requests per minute, as measured by load testing results, by architecting scalable RESTful APIs in Node.js and Express.js.

PROJECTS

AI Interview Preparation System | 2025 – 2026

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, Axios, CORS, Render

Full-stack AI platform that scores resume-to-job fit and generates personalized interview roadmaps.

- Built a resume/JD matching engine that scores fit and flags skill gaps automatically.
- Designed a JWT-secured authentication system supporting multi-user sessions.
- Shipped a real-time, API-driven frontend with Axios, deployed on Render.

E-Commerce Web Application | 2025

Tech Stack: React.js, MongoDB, Node.js, Express.js

- Built a scalable e-commerce platform with a 100+ item product catalog and cart functionality.
- Improved frontend rendering speed by 25% using React optimization techniques.
- Integrated a MongoDB database and implemented a secure authentication system.

TECHNICAL SKILLS

React.js, Redux, HTML5, CSS3, JavaScript (ES6+), Node.js, Express.js, REST API Development, MongoDB, Mongoose, Socket.io, JWT Authentication, Git, GitHub, Postman, VS Code, NPM, Full-Stack Development, Responsive Design, API Integration, MVC Architecture

EDUCATION

Master of Computer Application

GL Bajaj Institute of Technology and Management | 2023 – 2025

CERTIFICATIONS

- Full Stack Web Development — CoderInventa
- Git & GitHub Essentials — CoderInventa
