Summary

A highly motivated Engineering student pursuing an MCA (2-year) program, specializing in Computer science. Eager to leverage my academic foundation and analytical skills to contribute to innovative projects. I am currently seeking opportunities to apply my knowledge and passion for technology within a dynamic environment.

Experience

Jul 2024 - Aug 2024

Web Developer

e-SOFT TECHNOLOGIES

As a Web Developer Intern at SOFT TECHNOLOGIES (Internship, 2024), I contributed to developing and maintaining web applications. My responsibilities included coding and debugging, utilizing programming skills to enhance website functionality and user experience. I collaborated with team members to implement features and ensure project goals were met within the given timeframe.

Education

2025 - 2026

Presideny University, Bangalore

Post Graduation • MCA (2-Year) • Software Engineering

Percentage - 8% • CGPA - 8

As a postgraduate student pursuing an MCA (2-year) in Software Engineering at Presidency University, Bangalore, I am developing a strong foundation in software development principles and practices. My coursework is designed to equip me with the skills necessary to excel in the dynamic field of software engineering, and I am eager to apply my knowledge to real-world challenges. I am expected to graduate in 2026.

2020 - 2023

University of lucknow

GRADUATION • BCA • Computer

Percentage - 72% • CGPA - 7

I hold a BCA degree in Computer Science from the University of Lucknow, completed between 2020 and 2023. My coursework provided a strong foundation in computer science principles, preparing me for a career in the tech industry. This experience has equipped me with the skills and knowledge necessary to tackle challenges and contribute effectively to a dynamic work environment.

Skills

- HTML
- Java
- React.js
- DevOps
- Software Testing

Projects

Password generator

📅 May 2025 – May 2025

🔗 [Project Link](#)

The Password Generator Web App is a dynamic and user-friendly tool designed to help users create strong, secure, and customizable passwords instantly. Built using Python (Flask) for the backend and HTML/CSS with JavaScript for the frontend, the application emphasizes both functionality and a modern UI/UX experience.

Key Features:

- 🛠 Customizable Password Length: Users can select the desired password length using an intuitive slider.
- 📄 Character Options: Toggle inclusion of uppercase letters, lowercase letters, numbers, and special symbols for tailored security.
- 📊 Password Strength Indicator: Real-time visual feedback on the strength of the generated password (e.g., Weak, Medium, Strong).
- ⚡ One-Click Regeneration: Instantly generate a new password without refreshing the page.
- 📋 Copy to Clipboard: Single-click functionality to copy the password securely.
- 📱 Mobile Responsive Design: Optimized for usability on both desktop and mobile browsers.

Technology Stack:

- Frontend: HTML5, CSS3 (with custom styles), JavaScript
- Backend: Flask (Python)
- Design Tools: Bootstrap (optional), FontAwesome icons
- Hosting/Deployment: (e.g., GitHub Pages, Render, or localhost)
