Summary

Data-driven analyst with experience in SQL, Python, Excel, and Power BI, skilled in data analysis, dashboard reporting, trend identification, and insight generation. Familiar with survey analytics, market research reporting, and business intelligence workflows.

Skills

Technical & Analytics Skills: SQL, Python, Excel, PowerPoint, Statistical Analysis, Data Analysis, Trend Analysis, Data Interpretation, Data Visualization, Dashboard Development, Reporting

Business & Operations: Transaction Monitoring, System Health Monitoring, Incident Management, Escalation Handling, Stakeholder Communication, Issue Resolution, Real-Time Monitoring & Reporting, Insight Generation

Tools: Power BI, Excel

Soft Skills: Analytical Thinking, Communication, Problem Solving, Collaboration, Time Management

Experience

Artificial Intelligence Intern

Nov 2024 – Jan 2025

Infosys Springboard (Remote)

Tools Used: Python, Meta LLM, Slack API

- Developed an AI-driven system to monitor data trends and detect anomalies, reducing stock shortages by 20%
- Implemented real-time alerts and automated monitoring systems, improving response time by 30%
- Analyzed large datasets to generate actionable business insights and improve decision-making
- Collaborated with teams to ensure timely issue resolution and communication during system events

Data Science Intern

Sep 2024 – Oct 2024

Evoastra Ventures PVT LTD (Remote)

Tools Used: Python, PowerBI

- Analyzed 50,000+ data records to identify patterns, anomalies, and business trends.
- Built interactive dashboards in Power BI for real-time monitoring and reporting.
- Delivered data-driven insights to stakeholders for improved business decisions.
- Created analytical reports and dashboards to present insights in an easy-to-understand format for stakeholders.

Data Analyst Intern

Jul 2024 – Aug 2024

Unified Mentor PVT LTD (Remote)

Tools Used: Python, Excel

- Performed data analysis, trend identification, and reporting to support business insights and decision-making.
- Developed dashboards and reports to monitor key performance metrics.
- Extracted actionable insights from structured datasets for decision-making.
- Assisted in reporting and data visualization for stakeholders.

Projects

Animal Detection System on Railway Track | Python, Deep Learning, Roboflow

Jan 2025 – Jun 2025

- Built a real-time monitoring system to detect animals using deep learning.
- Proposed an alert mechanism for proactive issue detection and prevention.
- Improved safety through real-time data processing and alerts.

FIFA World Cup Data Analysis | Excel, Python

Jul 2024 – Aug 2024

- Conducted trend analysis to identify team performance patterns.
- Created visual dashboards to present insights and key metrics.
- Derived actionable insights from historical datasets.

Education

B.Tech. Information Technology

Graduated: 2025

Babu Banarasi Das Northern Indian Institute of Technology

CGPA: 7.25 / 10
