

ABHISHEK SINGH

Data Analytics | Python · SQL · Google Workspace · Power BI

Lucknow, Uttar Pradesh | +91-8303679982 | as1311757@gmail.com | linkedin.com/in/abhishek-singh

Summary

Analytical IT graduate (2025) with hands-on internship experience in data analysis, SQL-based reporting, and Python-driven business insights. Skilled in identifying anomalies, conducting custom analysis on large datasets, and distilling findings into clear, actionable recommendations for stakeholders. Proficient with Google Workspace (Sheets, Docs, Gmail, Drive, Slides) and experienced in using spreadsheets and programming languages to organise and analyse data. A self-directed learner who thrives in ambiguous problem spaces, works effectively within cross-functional teams, and is eager to build a long-term career in data analytics. Immediately available for the Google Data Analytics Apprenticeship programme.

Skills

Data Analytics & BI: Data Analysis, Trend Analysis, Anomaly Detection, Custom Analysis, KPI Reporting, Dashboard Development, Data Visualisation, Actionable Insights, Power BI

Programming & Databases: Python (Pandas, NumPy, Matplotlib), SQL, MySQL, PostgreSQL, Data Modelling, Query Optimisation

Spreadsheets & Workspace: Google Workspace (Sheets, Docs, Gmail, Drive, Slides, Chrome), MS Excel (Pivot Tables, Advanced Formulas, Filters), MS Office Suite (Word, PowerPoint)

Data Management: Data Extraction, Data Validation, Data Cleansing, Data Transformation, Business Reporting, Knowledge Sharing Documentation

Soft Skills: Problem Solving, Critical Thinking, Independent Work, Navigating Ambiguity, Attention to Detail, Cross-functional Collaboration, English Communication (written and verbal)

Experience

Data Analyst Intern | CollegeTips.in (Remote)

Apr 2025 – May 2025

- Conducted custom data analysis using SQL and Google Sheets to surface business trends and deliver actionable insights that supported team decision-making.
- Identified anomalies and inconsistencies across datasets by applying structured validation techniques, improving the reliability of business reports.
- Consolidated data from multiple sources into organised spreadsheet trackers, enabling stakeholders to monitor activity status and flag issues promptly.
- Created knowledge-sharing documents summarising analytical findings and data procedures, ensuring consistent access to insights across the team.
- Performed quality checks by cross-reviewing values, formats, and references to minimise errors that could impact reporting accuracy.

Artificial Intelligence Intern | Infosys (Remote)

Nov 2024 – Jan 2025

- Developed Python-based monitoring and reporting solutions that quantified business impact, reducing stakeholder response time by 30% through automated data-driven alerts.
- Extracted, transformed, and analysed business data to produce custom analytical reports, distilling complex datasets into clear, actionable takeaways for decision-makers.
- Gained hands-on understanding of the full data lifecycle — from raw extraction and transformation through to validated reporting — across multiple business units.
- Applied Python (Pandas, NumPy) and SQL to organise and analyse structured data, identifying patterns and anomalies that informed operational recommendations.
- Collaborated with cross-functional stakeholders to gather requirements and deliver data solutions, communicating findings in clear English through written updates and presentations.

Data Science Intern | Evoastra Ventures PVT LTD (Remote)

Sep 2024 – Oct 2024

- Analysed 50,000+ records to uncover industry trends, anomalies, and business opportunities, translating raw data into structured insights for management review.
- Built Power BI dashboards and Google Sheets-based trackers that enabled teams to quantify the business impact of operational decisions through visual data reporting.
- Applied the full data lifecycle — collection, cleansing, transformation, validation, and reporting — to deliver accurate, analysis-ready datasets for multiple business groups.
- Conducted custom analysis to identify patterns in large datasets, producing concise summaries with actionable recommendations across different business areas.
- Documented analytical procedures and findings in organised knowledge-sharing files to ensure colleagues could follow consistent, reproducible data workflows.

Projects

Blinkit Sales & Inventory Analytics | Power BI

- Built complex SQL queries using joins, subqueries, CTEs, and window functions to conduct custom analysis of sales performance, inventory levels, and discount impact.
- Created Google Sheets-based reporting datasets and validated data accuracy, producing actionable insights to support business decision-making across inventory categories.

AI-Based Inventory Optimization System | Python, SQL, Forecasting

- Developed a forecasting-driven inventory optimisation solution, applying data analysis techniques to quantify supply chain gaps and recommend stock adjustments.
- Built automated monitoring mechanisms that surfaced anomalies and triggered alerts, reducing the manual effort required to track supply chain performance metrics.

Animal Detection System on Railway Track | Python, YOLOv8, Computer Vision

- Built a real-time computer vision system to detect animals on railway tracks and trigger automated safety alerts, validated through structured testing procedures.
- Documented model performance findings and distilled results into a concise summary report for stakeholder review, communicating technical outcomes in accessible language.

Education

B.Tech. Information Technology

Babu Banarasi Das Northern Indian Institute of Technology

Graduated: 2025

CGPA: 7.25 / 10
