PROFESSIONAL SUMMARY

- More than 1 years of professional experience in developing various object-oriented programming (OOPS) and web-based enterprise applications using Java J2EE/J2ee technologies and working on full software development cycle.
- Responsible for creating and maintaining architecture for **Restful API** using **Spring Boot**.
- Good understanding of common API technologies, such as **Spring Boot**.
- Experience in Core Java, Java8, J2EE and Frameworks.
- Experience in application/web servers like Apache **Tomcat Web Server**.

TECHNICAL SKILLS

- Java
- Java8
- Spring IOC
- Spring MVC
- Spring Boot
- JWT
- Spring Security
- Hibernate
- HTML
- CSS
- Bootstrap
- MySQL
- PostgreSQL

EXPERIENCE

CKD Venture consultancy Pvt. Ltd - Java Software Developer
20 Nov / 2024 - Present

PROJECTS

1: Hospital Mangement System

Size: 6

Environment: Spring Boot, Spring, Hibernate, Collection Framework, Core Java, Java-8, JPA

Database: .PostgreSQL

Description: Developed and maintained backend architecture for a comprehensive Hospital Management System (HMS) encompassing both Inpatient Department (IPD) and Outpatient Department (OPD) functionalities. Designed RESTful APIs for critical hospital workflows including patient registration, appointment scheduling, medical records management, and discharge processes. Enhanced system performance and reliability through efficient data handling and seamless integration across various modules of the hospital.

Responsibilities:

- Designed and developed software modules in project as per the requirement.
- Created a Spring MVC Architecture to improve web application performance and resolve issues.

BUILD TOOLS

- Maven
- Postman
- MySQL Workbench
- Swagger
- Pg Admin

IDE & GUI

- STS
- Visual Studio
- IntelliJ IDE
- NetBeans

OPERATING SYSTEM

- Windows

LANGUAGES

- English, Hindi

- Implemented Data Access Layer using Spring Data and Hibernate ORM tool and enhanced system performance.
- Improved the web application's performance scalability and robustness by designing, developing, and configuring Spring Bean Wiring, Spring DAO.

2: School Management System

Team Size: 5

Environment: Spring MVC, Hibernate, JSP, Collection Framework, Core Java, java-8, Spring Security, JWT

Database: PostgreSQL.

Description: Developed a robust backend for a School Management System using Spring Boot and PostgreSQL, ensuring efficient management of student data, attendance, grades, and teacher-student interactions.

Implemented JWT-based authentication and role-based authorization, ensuring secure access to the system for various user roles such as Admin, Teacher, and Student. Created RESTful APIs to manage student records, teacher assignments, class schedules, and grades, ensuring seamless communication between frontend and backend.

Integrated a dynamic user management system, allowing Admins to create, update, and manage user roles and permissions with granular control over the application. Developed secure login and registration modules with JWT authentication to protect sensitive data and provide token-based security for user sessions. Designed and implemented scalable microservices architecture, providing high availability, fault tolerance, and efficient error handling to ensure smooth operation in a real-world school environment. Set up automated email notifications using JavaMailSender to send attendance reports, grade updates, and system alerts to students and teachers, enhancing communication. Ensured system scalability and reliability by incorporating centralized logging, error tracking, and performance monitoring, enabling quick issue resolution and continuous improvement.

Responsibilities:

- Involved in gathering the requirement of the Project.
- Involved in creating Controller Classes.
- Implements Entity and Binding classes.
- Injected Spring Services into Controller Classes.
- Involved in Scrum meetings and working in an Agile.

EDUCATION

- Lal Bahadur Shastri Management and Development Studies , Lucknow
- Master of Computer Application (MCA)

PERSONAL DETAILS

Nationality : Indian
 Sex : Male
 Designation : Java Backend Developer
 Address : Lucknow , UP
