Professional Summary

Results-driven Software Engineer with over 6 years of experience in designing, developing, and maintaining scalable, high-performance web and mobile applications. Experienced in full-stack development with strong expertise in PHP, Laravel, JavaScript, modern front-end frameworks, RESTful APIs, database design, and cloud-based application deployment. Proficient in building secure, maintainable, and performance-optimized applications by following industry best practices, clean architecture principles, and coding standards. Hands-on experience in developing end-to-end solutions, integrating third-party APIs, implementing authentication and authorization mechanisms, optimizing database queries, and improving application performance for high-traffic systems. Skilled in working within Agile/Scrum development environments, collaborating closely with crossfunctional teams including product managers, designers, QA engineers, and stakeholders to translate complex business requirements into scalable technical solutions. Adept at participating in the complete software development lifecycle—from requirements gathering and system design to development, testing, deployment, and production support. Demonstrated ability to troubleshoot complex technical issues, refactor legacy applications, and continuously improve code quality through code reviews, testing, and documentation. Passionate about learning emerging technologies, mentoring junior developers, and driving engineering excellence through knowledge sharing and collaborative problem-solving. Committed to delivering reliable, user-centric software solutions that align with business objectives while ensuring scalability, security, and long-term maintainability.

Professional Experience

2020 – 2026

Lucknow, Uttar Pradesh

Senior Software Engineer / Software Engineer, DEVtrust - DevTech Enterprises Pvt. Ltd

- Designed and developed scalable web and mobile applications using Laravel, Node.js, React.js, Next.js, and React Native Built and maintained robust backend services using Node.js, TypeORM, MySQL, MongoDB, and REST/GraphQL APIs Implemented secure authentication, authorization, and role-based access control systems Integrated multiple third-party services to support payments, notifications, logistics, and customer engagement Collaborated with product managers, designers, and QA teams to deliver high-quality features on time Optimized application performance, improved database queries, and reduced API response times Actively participated in code reviews, mentoring junior developers, and enforcing best coding practices

Education

2017

Ashoka Institute of Technology and Management Varanasi (Dr. A.P.J. Abdul Kalam Technical University – AKTU), Bachelor of Technology (B.Tech) – Computer Science

Technical Skills

Frontend – React.js, Next.js, React Native, Vue.js, JavaScript (ES6+), TypeScript, HTML5, CSS3

Backend – Node.js, PHP (Laravel), REST APIs, GraphQL

Databases & ORM – MySQL, MongoDB, TypeORM

Tools & Platforms – GitHub, Bitbucket, Jira, Slack, Microsoft Teams, OpenProject, SonarQube, Jenkins

Key API & Third-Party Integrations

Key API & Third-Party Integrations

- Payment Gateways: Dwolla, Stripe, Square, Authorize.Net
- Communication: Twilio (SMS, Voice), Mailchimp (Transactional Emails)
- Support & CRM: Zendesk (Ticket Management)
- Logistics: Shippo (Shipping & Tracking)
- Financial & Compliance: Plaid API, Zoho (Digital Signature)
- And other custom third-party APIs as per business needs

Projects

BillingZero, Contract Management Platform (similar to Fiverr)

- Designed and developed scalable backend services using Laravel and MySQL.
- Implemented Stripe-based payment and subscription management.
- Built secure APIs with role-based access control and authentication.
- Developed responsive and user-friendly interfaces using Next.js.

MyProPhoto, Task Management Platform

- Developed scalable backend services using Laravel and MySQL.
- Implemented automated monthly invoice generation using Stripe.
- Improved system reliability and performance through optimized database queries.

AnchorChat, Customer Support & Communication Platform

- Developed scalable services using Node.js and MongoDB.
- Integrated Zendesk for ticket management and Twilio for SMS and voice communication.
- Implemented transactional email workflows using Mailchimp, and integrated monday.com for workflow automation and Jobber for job scheduling and service management.

Number Scan, Online Gaming Platform

Developed a scalable online gaming platform using Node.js, Next.js, GraphQL, and TypeORM. Designed and implemented secure GraphQL APIs for seamless communication between the frontend and backend. Built responsive and high-performance user interfaces using Next.js with server-side rendering (SSR). Designed and optimized database schemas using TypeORM to ensure efficient data management and query performance. Implemented user authentication, game session management, leaderboards, and real-time game data handling

Customer Support Chatbot, Next.js, Node.js, GraphQL, OpenAI API, TypeORM

Developed an AI-driven customer support chatbot capable of answering FAQs and resolving common customer queries. Integrated the OpenAI API to generate context-aware responses. Implemented conversation history, user authentication, and admin management features. Built GraphQL APIs and optimized backend performance for high-volume traffic. Enhanced customer engagement by providing instant, AI-assisted support.

ACTIVITIES & INTERESTS

- Coding & Exploring New Technologies
- Playing Cricket & Card Games
- Listening to Music

Core Competencies

Core Competencies

- Full-Stack Web & Mobile Application Development
- REST & GraphQL API Design and Integration
- Payment Gateway & Third-Party Service Integrations
- Agile / Scrum Methodologies
- Database Design, Optimization & Performance Tuning
- Scalable, Secure & Maintainable System Architecture
