EXPERIENCE

Software Development Engineer Intern 🔗

Jun 2025 – Aug 2025

- Designed and developed responsive front-end interfaces using **HTML**, **CSS**, and **JavaScript**, ensuring cross-browser compatibility.
- Integrated front-end components with backend APIs to implement authentication, search, and dynamic data rendering.
- Optimized UI performance and usability by applying clean design principles to enhance overall user experience.

PROJECTS

BidHub — Online Auction Platform 🔗 | React.js, Node.js, Socket.IO, MongoDB

May 2026

- Developed a full-stack real-time auction platform using React.js (Vite) for the frontend and Express.js/Node.js for the backend, enabling buyers, sellers, and admins to create, manage, and participate in auctions.
- Implemented Socket.IO-based real-time bidding with server-side validation, optimistic UI updates, live notifications, and bid broadcasting to maintain low-latency and consistent auction states across clients.
- Built secure REST APIs with JWT authentication, role-based middleware, and a responsive Tailwind CSS interface for cross-device compatibility.

Task Management Web Application 🔗 | JavaScript, React, CSS

Dec 2025

- Developed a Kanban-style Task Management Web App using React, Node.js, and LocalStorage, enabling users to efficiently organize daily tasks.
- Built a Team Collaboration Board with real-time updates using React and TailwindCSS, enhancing team communication and transparency.
- Created a Personal Productivity Tracker and statistics dashboard with React and LocalStorage, helping users monitor progress and visualize productivity patterns.
