AI Engineer focused on transforming complex business problems into intelligent AI solutions through Machine Learning, Generative AI, LLMs, and modern AI application development.

PROFESSIONAL SUMMARY

AI Engineer with hands-on experience in building AI-powered applications using Python, Machine Learning, Generative AI, LLMs, and RAG. Skilled in developing intelligent solutions with Semantic Kernel, Azure AI, FastAPI, and Streamlit, with a focus on scalable, real-world AI applications.

ACCOMPLISHMENTS

- Built 3+ AI-powered applications using Python, LLMs, and Generative AI.
- Developed intelligent AI solutions using Semantic Kernel, Azure AI, FastAPI, and Streamlit.
- Designed scalable AI applications for real-world business use cases.
- Implemented RAG-based solutions for intelligent document processing and chat assistants.
- Applied machine learning and NLP techniques to solve practical problems.
