SUMMARY

Backend developer specializing in Node.js, CI/CD automation, and developer tooling, with 1.5+ years of open-source contributions at AsyncAPI. Built production-ready workflows and APIs improving automation efficiency and reliability. Seeking backend engineering or full stack roles in product-focused teams.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, YAML, Markdown, SQL

Backend: Node.js, Express.js, REST APIs, CI/CD

Frontend: React.js, Next.js, SCSS, EJS

Database & Tools: PostgreSQL, Prisma ORM, Drizzle ORM

DevOps & Tools: GitHub Actions, Git, PNPM, NPM

OPEN SOURCE CONTRIBUTIONS

Open Source Developer

Dec 2022 – Present

AsyncAPI Initiative

Worldwide

- * Implemented a CI workflow which takes YouTube video from AsyncAPI YouTube channel and uploads them on Spotify Podcast.
- * Wrote documentation for the 'YouTube to Spotify Podcast' workflow to get users started with it.
- * Implemented JSON Schema validator inside CI (GitHub Actions). Validates any incoming JSON files in a PR.
- * Added automation of docs for the Glee project.
- * Introduced workflow to validate external examples as well as the embedded ones in the AsyncAPI Spec document.
- * Wrote a script which validates embedded examples in asyncapi.md file
- * Reviewed technical documentation across various repositories in AsyncAPI
- * *Merged 20+ pull requests.*

PROJECTS

CampusVault | Code | Live Deployment

Dec 2025 – Present

- Architected and shipped a TypeScript backend service with Node.js/Express, designing APIs for a campus food platform with clear separation from the Next.js frontend.
- Built reliable data and validation layers using PostgreSQL, Drizzle ORM, and Zod, improving schema safety and reducing runtime data-contract errors across endpoints.
- Implemented authentication with Better Auth and standardized monorepo workflows using pnpm workspace scripts, linting, and build pipelines to improve developer velocity and maintainability.

Youtube to Spotify CI Workflow | Code

Mar 2026

- Shipped a one-click YouTube to Spotify publishing bot that converts a manual creator workflow into an automated pipeline using yt-dlp and Playwright
- Built battle-tested browser automation for Spotify for Creators with persistent sessions, login fallback, adaptive selectors, and screenshot/state capture for failure recovery
- Productized the workflow using GitHub Actions and secrets-based operations, including state-size hardening for platform limits and a clear non-technical runbook

EDUCATION

Chandigarh University

Jul 2022 – Jun 2026

Bachelor of Engineering in Computer Science and Engg.

Mohali, Punjab
