Career Objective

Motivated and detail-oriented Software Engineer with a strong foundation in full-stack development, object-oriented programming, and agile methodologies along with Interpersonal skills. Proficient in designing, developing, and deploying scalable web applications using modern technologies like Python, JavaScript, Flask, and MongoDB. Passionate about solving real-world problems through efficient code and continuous learning

Key Expertise

- Full stack development
- DSA with Java
- Android Application Development
- Version Control (Git) and Gitlab CI/CD pipelines
- Strong Debugging and problem-solving skills
- Communicational Skills
- Presentation and Problem Solving skills

Education

Shri Ramswaroop Memorial College of Engineering and Management, Btech in Information Technology Nov 2022 – Present

- **Coursework:** Java , Data Structures and Algorithms , Software Engineering, OOPs , Computer Networks, DBMS, Operating System, Web Designing

Exon Montessori School April 2019 – March 2020

- Class X

Navyuga Radiance Senior Secondary School April 2021 – March 2022

- Class XII

Experience

Fresher

Internships and Trainings

Summer Training in Data Science with AI	October 2023
Summer Training in Cloud Computing	September 2024
Summer Training in AI with LLM	June 2025
Web Developer Intern at Unified Mentor	July 2025
ISP intern at Internshala	July 2025
Fullstack Development Bootcamp	June 2025

Projects

Weather Application [Link](#)

- Goal of this project is to develop a responsive, interactive weather app using HTML, CSS, and JavaScript that allows users to retrieve real-time weather information for any city in the world.
- Tools Used: HTML, CSS, Java Script, API Integration

Spotify clone Music Application [Link](#)

- It is an elegant static interface demonstrating front-end web design skills. With a focus on UX, visual layout, and potentially audio control, it stands as a strong foundation for extending into a more dynamic, API-driven music application.
- Tools Used: HTML, CSS, Java Script, API Integration

Responsive Website for Delight Industrial Services

[Link](#)

- Goal of this project is to develop a responsive, interactive website using HTML, CSS, and JavaScript that allows users to retrieve real-time response and contact from all over the world.
- Tools Used: HTML, CSS, Java Script, EmailJS

Android Application

[Link](#)

- A mobile-based application designed to provide personalized pregnancy care, health tracking, and expert guidance to support women throughout their pregnancy journey.
- Tools Used: Flutter, Firebase (Authentication Cloud Firestore), API Integration, AI , Github.

Technical Skills

Languages: C + + , C, Java, Python, SQL, JavaScript

Technologies: .NET, Microsoft SQL Server, ReactJS, Bootstrap, Flex, Grid, SpringBoot

Others: HTML, CSS, Software Development, OOPs, DSA, Git, Github, Gitlab, Problem-Solving

Achievement

Solved 150+ questions on various coding platforms like GFG, Leetcode, Hackerrank, Pepcoding.
