Career Objective

Motivated B.Tech Electronics and Communication Engineering student with strong proficiency in core and IT domains, seeking an entry-level role in the IT industry to leverage programming, problem-solving, and technical skills for developing efficient, innovative, and scalable solutions while contributing to organizational growth and continuously enhancing my expertise.

Key Expertise

- Full stack development
- Strong foundation in ECE
- Android Application Development
- Version Control (Github)
- Strong Debugging and problem-solving skills
- Proficient in Frontend Development using HTML, CSS, JavaScript, and React.js.
- Presentation and Problem Solving skills

Education

Shri Ramswaroop Memorial College of Engineering and Management, Btech in Electronics and Communication Engineering Nov 2022 – Present

- **Coursework:** Circuits, communication systems, microprocessors, signal processing, along with programming, data structures, and IT-oriented electives.”

New Public College April 2019 – March 2020

- Class X

New Public College April 2021 – March 2022

- Class XII

Experience

Fresher

Internships and Trainings

Summer Internship on Fundamental of EV October 2023

Summer Internship on Charging management with AI and ML September 2024

Summer Training of Labview June 2025

Fullstack Development Bootcamp July 2025

Projects

Weather Application [Link](#)

- Goal of this project is to develop a responsive, interactive weather app using HTML, CSS, and JavaScript that allows users to retrieve real-time weather information for any city in the world.
- Tools Used: HTML, CSS, Java Script, API Integration

Smart Agriculture Drone with AI Pest Detection

- Developed a drone-based crop monitoring system with AI-powered pest detection for precision farming.
- Tools Used: UAV drone platform, high-resolution thermal cameras, GPS module, onboard sensors, and image processing/AI software for pest detection.

E-Commerce Website

[Link](#)

- Goal of this project is to enables businesses to sell products or services over the internet, providing users with a convenient way to browse and purchase items. It includes features such as product listings, search functionality, shopping carts, and secure payment gateways to ensure smooth and safe transactions.
- Tools Used: HTML, CSS, Java Script, EmailJS

Technical Skills

Languages: C++ , C , Java , Python , Javascript, VLSI

Technologies: Raspberry Pi, ReactJS, Bootstrap, Flex, Grid, SpringBoot

Others: HTML, CSS, Software Development, OOPs, DSA, Git, Github, Gitlab, Problem-Solving

Achievement

Solved 150+ questions on various coding platforms like GFG, Leetcode, Hackerrank, Pepcoding.
