

HEMANT KUMAR

+91-7376568101 Noida, UP

hemant.k2807@gmail.com [LinkedIn](#) [Portfolio](#) [GitHub](#)

Full-Stack Developer skilled in PERN stack and Data Structures & Algorithms, building AI-powered SaaS applications with secure authentication, subscriptions, real-time features, and scalable RESTful APIs.

EDUCATION

Ajay Kumar Garg Engineering College [2023-2027]	CGPA: 7.50
Bachelor of Technology-Computer Science Engineering	
Senior Secondary- Delhi Public School, Bareilly [2021-2022]	Percentage: 85%
Secondary- Delhi Public School, Kalyanpur [2019-2020]	Percentage: 86%

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C++, C, Java, SQL

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3, WebSockets

Backend: Node.js, Express.js, REST API, Socket.IO, Inngest, MongoDB, PostgreSQL, NestJS

Tools & DevOps: Git, GitHub, Vercel, Docker, Linux, JWT, NextAuth.js, Razorpay API

PROJECTS

Lumodraw — Next.JS, Websockets, Node.js, Express.js, PostgreSQL ([Github](#)) ([Live Link](#))

- Architected a real-time collaborative whiteboard using WebSockets (Socket.io) and PostgreSQL, supporting 50+ concurrent users per room with sub-100ms synchronization latency.
- Engineered a high-performance rendering engine capable of handling complex shapes and text annotations at a smooth 60fps using optimized HTML5 Canvas API calls.
- Developed advanced state management features including multi-element grouping and infinite workspace zoom/pan, utilizing a Command Pattern for robust undo/redo functionality.
- Implemented room-based collaboration with shareable session links and isolated canvas state per room, enabling secure multi-user sessions and designed Export/Import functionality (PNG, SVG, JSON) with auto-save.

Aurevo — Next.js, Tailwind CSS, Node.js, Express.js, PostgreSQL, Gemini AI, Razorpay ([Github](#))

- Developed an AI-driven LMS SaaS featuring subscription-based access via Razorpay and secure OAuth authentication through NextAuth.js.
- Architected an automated content pipeline using Google Gemini AI to generate personalized course outlines, flashcards, and quizzes, significantly reducing manual overhead.
- Designed scalable RESTful APIs for course management and user analytics, leveraging Neon (Serverless PostgreSQL) for cost-efficient data storage.
- Implemented background workflows with Inngest to process AI generation tasks asynchronously, ensuring sub-second response times for the primary user interface.

Guftagu — React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Lucide-React ([Github](#)) ([Live Link](#))

- Engineered a real-time messaging application with Socket.IO, enabling instant message delivery and online status tracking for 500+ users with 99.99% uptime and zero downtime incidents.
- Architected a secure backend with Node.js and Express.js, utilizing JWT for stateless authentication and MongoDB for optimized message persistence and retrieval.
- Designed a fluid, mobile-first user interface in React that implements optimistic UI updates, reducing perceived latency for message delivery to near-zero.

ACHIEVEMENTS

- Amazon ML Summer School 2025: Selected in Top 2% out of 50,000+ applicants
- Adobe India Hackathon 2025: Advanced to Round 3, ranked 98th among 4,000+ competing teams nationwide.
- K3PC Coding Contest, KIET Ghaziabad: Secured Team Rank 6 out of 250+ participating teams.
- Smart India Hackathon 2025: Advanced to SIH'25 Finals and emerged as Finalists.
