AI Powered Portfolio: <https://kaushal121.pythonanywhere.com/>

PROFESSIONAL SUMMARY

B.Tech Information Technology graduate specializing in applied GenAI - RAG pipelines, LLM integration (Gemini, Claude, Groq/Llama), and AI agent design. Independently designed, built, and deployed multiple production-style AI applications, backed by a full-stack internship shipping REST APIs on Django and PostgreSQL. Seeking a Fresher / Intern role in AI Agent Engineering, RAG, or GenAI Development.

CORE TECHNICAL SKILLS

AI / GenAI: LLMs, AI Agents, RAG, LangChain, Prompt Engineering, ChromaDB, Gemini API, OpenAI API, Claude API, Groq API

Machine Learning: Scikit-learn, TensorFlow, PyTorch, Pandas, NumPy, Model Training and Evaluation, Deep Learning

Backend and APIs: Python, Django, FastAPI, Flask, REST APIs, JWT Authentication, SQL

Databases and Version Control: PostgreSQL, MySQL, SQLite, Git, GitHub

Cloud and DevOps: Docker, AWS, CI/CD, Railway, Render

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern | TNS India Foundation

March 2024 – Oct 2024

- Developed REST-style APIs for an e-commerce management platform handling product and order workflows.
- Built SQL-based CRUD operations and backend services using Django and PostgreSQL.
- Integrated frontend interfaces with backend APIs to ensure seamless data exchange and transaction processing.

KEY PROJECTS

JanMitra AI — Intelligent Citizen Assistance Platform

2026

Tech Stack: Python, Django, Gemini API, RAG, LangChain, PostgreSQL, HTML, CSS, JavaScript

- Designed a multilingual RAG pipeline that answers citizen queries on government schemes, official documents, and public services, backed by a Gemini-powered retrieval and generation layer.
- Added OCR-based document parsing (Tesseract) and Gemini-driven fraud and anomaly checks so uploaded citizen documents are analyzed automatically before being surfaced in chat.
- Built JWT-secured Django REST APIs for personalized user sessions and containerized the full stack with Docker for production-style deployment.

Medical Insurance Cost Prediction

2026

Tech Stack: Python, Scikit-learn, Flask, Pandas, NumPy, Render

GitHub: <https://github.com/officialkush/medical-insurance-cost-prediction> | **Live Demo:** <https://medical-insurance-cost-prediction-y255.onrender.com>

- Built and deployed an **end-to-end ML web application** predicting insurance costs from age, BMI, smoking status, gender, region, and dependents — achieving $R^2 = 0.97$ on 2,700+ row test dataset.
- Performed full ML pipeline: data preprocessing, feature encoding, regression model training, and Flask API integration; deployed on Render for real-time predictions.

Automated Sales Assistant 2026

Tech Stack: Python, Gradio, Groq API, Llama 3.3 70B, OpenAI SDK, python-dotenv

- Built a conversational AI agent to automate customer interactions, handling natural-language product, pricing, and feature queries in real time.
- Integrated Gemini via the OpenAI SDK, adding conversation memory and custom system prompts to keep responses fast and context-aware.
- Architected for extensibility toward RAG-based knowledge retrieval, lead qualification, and multilingual support.

AI Weather Dashboard

Oct 2025 – Dec 2025

Tech Stack: Python, Django, Gemini API, REST APIs, Chart.js, HTML, CSS, JavaScript

- Built an **AI-powered weather dashboard** integrating live Weather APIs for real-time data and forecasts, with **Gemini API** generating contextual insights and activity recommendations.
- Developed interactive UI components including temperature charts, forecast grids, and weather maps.

EDUCATION

B.Tech — Information Technology

2021 – 2025

Excel Engineering College, Anna University Chennai | Best Outgoing Student — IT Department

CERTIFICATIONS

- AI Engineer Core Track: LLM Engineering, RAG, QLoRA & AI Agents** – Udemy (2026)
- Machine Learning A-Z [2026]: AI, Machine Learning, Deep Learning, AWS, Python & R** — Udemy
