

MANMEET SINGH

Software Engineer

☎ +91-8887035168 ✉ manmeetms97@gmail.com 🌐 github.com/Mann0001 🔗 manns-portfolio.vercel.app

Summary

Passionate Software Engineer with a strong foundation in Data Structures and Algorithms. Experienced in building scalable web applications using JavaScript, Node.js, and SQL. Passionate about problem-solving and developing efficient, real-world software solutions.

Skills

Languages: Java, JavaScript

Frontend: HTML, CSS, Bootstrap

Backend: Node.js, Express.js

Databases: MySQL, MongoDB

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS

Experience

Software Developer Intern

Jan 2026 – Feb 2026

Tata Motors

Tech Stack: Node.js, Express.js, MySQL

- Developed a machine-management system (Node.js, MySQL) that **reduced downtime by 30%**, streamlining machine upkeep and boosting operational efficiency.
- Designed normalized database schemas (MySQL) and indexing strategies, improving query performance by **45%** for data queries.
- Automated preventive-maintenance ticketing, **eliminating 80%** of manual scheduling work (tracked via database logs).
- Built a dynamic resource-allocation feature, **increasing task assignment accuracy by 25%** and improving system reliability.

Projects

Wanderlust | Node.js, Express.js, MongoDB, EJS, Bootstrap

March 2025 – June 2025

- Built a full-stack travel web app enabling 24/7 property and review management, **serving 1,000+ users** during pilot.
- Integrated user authentication (Passport.js) with role-based access, securing profiles and **protecting 500+ user accounts**.
- Designed REST APIs for bookings (MongoDB/Mongoose), **reducing API response time by 40%** with cascade deletions.
- Implemented image uploads via Cloudinary and Joi validation, **cutting image-processing errors to 0%**.

Backend Ledger System | Node.js, Express.js, MongoDB

March 2026 – April 2026

- Built a secure banking backend (Node.js/MongoDB) for processing credit/debit transactions daily.
- Implemented JWT authentication and RESTful APIs, **supporting 99% uptime** for transaction services.
- Adopted a ledger data model ensuring **100% consistency** in user balances under concurrency.
- Added request validation middleware (Joi), cutting backend errors by **90%** and improving reliability.

Achievements & Activities

- Selected for Samsung Innovation Campus (Coding & Programming Track) at University of Lucknow
- Solved 200+ Data Structures & Algorithms problems on coding platforms such as LeetCode and GeeksforGeeks
- Completed Full Stack Web Development Course (Apna College)

Education

B.Tech Computer Science and Engineering

Graduation Year: 2026

University of Lucknow, Lucknow

CGPA: 7.52 / 10
