Summary

Full-Stack Software Developer specializing in scalable web applications, RESTful APIs, real-time systems, and distributed back-end development using React.js, Node.js, Express.js, MongoDB, Redis, and Socket.IO. Skilled in authentication, API integration, database design, and performance optimization.

Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS
Backend: Node.js, Express.js, REST APIs, JWT Authentication, OAuth, Socket.IO, WebSockets
Databases: MongoDB, Mongoose, MySQL, Redis
Tools: Git, GitHub, Docker, Postman, Stripe, Vercel, Render
Core CS: Data Structures Algorithms, DBMS, Operating Systems, Computer Networks, OOP

Experience

Full Stack Developer Intern June 2026 – Present
CyberForenX & Associates — Remote

- Developed and maintained full-stack web application features using React.js, Node.js, Express.js, MongoDB, and JavaScript.
- Built RESTful APIs, implemented backend business logic, optimized database queries, and fixed application bugs.
- Collaborated in an Agile team using Git, GitHub, pull requests, and code reviews to deliver production-ready software.

Projects

IRCTC : Train Reservation System | *React.js • Redux Toolkit • Node.js • Express.js • MongoDB • Redis • Socket.IO • Stripe*
[Live Demo](#) | [GitHub](#)

- Built a train reservation platform supporting **RAC**, **GNWL/RLWL/PQWL** waitlists, **cancellations**, and automated **seat promotion workflows**.
- Engineered **concurrency-safe booking** with **segment-based seat allocation**, **seat locking**, **Redis caching**, and **real-time updates** using Socket.IO.
- Integrated **JWT/OAuth authentication**, **Stripe payments**, and a modular **MVC architecture** to improve security, maintainability, and scalability.

Luna : Privacy-First Local AI Desktop Assistant | *Electron • React • TypeScript • Node.js • SQLite • Ollama • Tailwind CSS* | [GitHub](#)

- Built a **cross-platform AI desktop assistant** using **Electron**, **Ollama**, and **SQLite** with **real-time streaming AI conversations**.
- Developed **AI chat**, **long-term memory**, **rich-text notes**, **PDF/Text document understanding**, and **desktop automation** features.
- Implemented **privacy dashboard**, **conversation history**, **local document processing**, and packaged the application for macOS using **Electron Builder**.

SooN : Real-Time Video Meeting Platform | *React.js • Node.js • Express.js • WebRTC • Socket.IO • Tailwind CSS*
[Live Demo](#) | [GitHub](#)

- Built a real-time video meeting platform using **WebRTC** and **Socket.IO**, enabling low-latency peer-to-peer audio and video communication.
- Implemented **screen sharing**, **live chat**, **meeting controls** (microphone/camera toggle), and **room-based signaling** using the WebRTC Offer/Answer model and ICE candidate exchange.
- Designed a responsive meeting interface with dynamic participant layouts, real-time media stream management, and a scalable architecture supporting multi-user conferencing.

Education

Lovely Professional University, Punjab 2025 – 2027
Master of Computer Applications (MCA)

MIMT, Greater Noida 2022 – 2025
Bachelor of Computer Applications (BCA)

Achievements & Certifications

- 1st Prize** — **Inter-College Hackathon**, IIMT College of Management (Oct 2024)
- Solved 100+ Data Structures and Algorithms problems across LeetCode and GeeksforGeeks.
