SUMMARY

Software Engineer with 2 years of experience building scalable web applications using Python, React, Next.js, and Node.js. Specialized in AI-powered systems including LLM chatbots, RAG pipelines, voice assistants, and recommendation engines. Experienced with OpenRouter, Ollama, and vector databases (pgvector), delivering high-performance user-centric applications.

TECHNICAL SKILLS

Programming: Python JavaScript SQL

Frontend: React Next.js Redux HTML CSS Tailwind Bootstrap

Backend: Node.js Express.js FastAPI REST APIs

Database: MongoDB MySQL Firebase pgvector

AI & LLM: OpenRouter Ollama Mistral RAG LangChain Prompt Engineering

Tools: Git GitHub Jira Confluence Kibana

EXPERIENCE

Software Engineer

Dec 2024 – Present

TripleAce Solution Pvt Ltd

- Optimized React UI components to improve application performance, responsiveness, and user experience
- Integrated REST APIs and third-party libraries to improve scalability, stability, and feature delivery
- Built AI-powered UI features including chatbot interfaces and intelligent interaction workflows
- Collaborated with cross-functional teams to deliver high-quality features within project deadlines
- Resolved complex UI issues through debugging, refactoring, and frontend performance optimization
- Worked on the BEEA Trading Platform for commodity bidding and distributor management workflows
- Developed backend APIs using Node.js and Express for data handling and system integration
- Used Python for AI integrations including LLM workflows, RAG pipelines, and chatbot features
- Integrated LLM APIs and RAG workflows for AI-powered user interactions

Web Developer Intern

Jun 2024 – Nov 2024

Headway Vision Solutions

- Built scalable React applications using reusable UI components to improve maintainability and efficiency
- Integrated REST APIs and Firebase authentication for secure login, user management, and data handling
- Collaborated with backend developers to optimize API communication and improve application performance
- Debugged and optimized applications to improve system stability, rendering performance, and user experience

AI PROJECTS

AI Chatbot (Mistral / OpenRouter)

- Built LLM chatbot with real-time AI responses using OpenRouter APIs
- Implemented prompt engineering and context management

RAG AI Chatbot

- Built RAG pipeline using vector embeddings, pgvector, and semantic retrieval
- Enabled semantic search for accurate responses

AI Voice Assistant

- Built voice-enabled assistant integrated with LLM workflows

CERTIFICATES

- Certified in Cisco Cybersecurity Essentials
- Completed AI Course on LLM, RAG, and AI Integrations

PROJECTS

- [Laundry E-commerce](#)
- [Multigame Portal](#)
- [E-commerce \(Buns & Roses\)](#)
- [AI Chatbot](#)
- [RAG Chatbot](#)
- [BEEA Trading Platform](#)

EDUCATION

B.Tech (ECE)

Government Engineering College, Buxar
