PROFESSIONAL SUMMARY

Dynamic and results-driven Frontend and Mobile Application Developer specializing in React Native & React.js development. Proven track record in designing, developing, and deploying highly responsive, cross-platform applications using JavaScript (ES6+), HTML, CSS, and Bootstrap. Proficient in optimizing application architecture and state management with Redux Toolkit, Redux Thunk, and Context API to build scalable, user-centric products.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), HTML5, CSS3, React.js, React Native, Redux Toolkit, Redux Thunk, Context API

UI & Mobile Tools: Bootstrap, React Native Paper, Expo, React Navigation, Axios, JSON Server, react-native-chart-kit

Developer Tools & Strengths: Git, GitHub, Clean Code, Agile Setup, Problem Solving, Team Collaboration

WORK EXPERIENCE

DevRhyme Foundation

July 2025 – September 2025

React & React Native Developer Intern

- Engineered and deployed the official responsive web application for DevRhyme Foundation using React.js and modern CSS, enhancing digital presence.
- Contributed actively to open-source projects, utilizing React and React Native for modular component development and performance optimizations.
- Mastered key engineering concepts including Git/GitHub workflows, code reviews, REST API integration, state management, and cross-platform mobile development.

PROJECTS

Todo Management Application | React Native, Expo, JSON Server, React Native Paper

April 2025

- Developed a cross-platform Todo Management application featuring complete User and Admin panels with dynamic CRUD task scheduling.
- Integrated data visualization dashboards using react-native-chart-kit to track user productivity via real-time analytics graphs.

MovieFlix App | React Native, OMDB API, React Navigation

April 2025

- Engineered a dynamic movie browsing platform fetching real-time media assets, ratings, and descriptions via OMDB API.
- Implemented category-based browsing with native trailer preview support while optimizing navigation state for steady 60 FPS performance.

Chat Wave - WhatsApp Clone | React Native, Context API, Axios, React Navigation

March 2025 – April 2025

- Built a real-time instant messaging app supporting secure user authentication, end-to-end routing, and synchronized backend storage via Axios.
- Leveraged React Navigation and Context API for state management across chat channels, custom chat rooms, and user profiles.

CERTIFICATIONS & ACHIEVEMENTS

- Sheryians Coding School:** Successfully completed Webdev Cohort 2.0 specialized in modern Full Stack Engineering practices.
- Infosys Data Analysis:** Completed official certification in Business Intelligence and fundamental Data Analysis using Power BI.
- Research Paper Publication:** Co-authored and successfully published an academic research paper on Fake News Detection inside an IEEE Conference.
- Hackathon Leadership:** Recognized and awarded as the Best Hackathon Organizer for managing the annual technical university symposium.

EDUCATION

Bachelor of Technology in Computer Science

July 2022 – 2026

SR Institute of Management & Technology | CGPA: 8.5 / 10.0
