OBJECTIVE

Full Stack Developer with hands-on experience building scalable MERN applications, REST APIs, JWT-based authentication systems, and database-driven platforms. GATE 2026 qualified with internship experience at Infosys Springboard and 300+ DSA problems solved.

SKILLS

Programming Languages: C++, C, Python, JavaScript

Backend Technologies: Node.js, Express.js, RESTful APIs, JWT Authentication, Nodemailer, Razorpay

Frontend Technologies: HTML, CSS, React.js, Tailwind CSS

Databases: MongoDB, MySQL

Libraries: Pandas, NumPy, Scikit-Learn, TensorFlow, OpenCV, MediaPipe

Developer Tools: VS Code, GitHub, Postman, Jupyter Notebook, Streamlit, Microsoft Excel, Vercel, Docker, Render

EXPERIENCE

Full Stack Development Intern | Infosys Springboard (Certificate) **Feb 2026 – Apr 2026**

- Contributed to **SkillBridge**, a volunteer-NGO platform, working in 5 member agile team environment, building **5 RESTful APIs** for opportunity browsing, filtering, and volunteer applications using Node.js, Express.js, and MongoDB.
- Designed **Application** and **Opportunity** Mongoose schemas and implemented **NGO-only authorization middleware** with role-based access control and duplicate prevention logic.

PROJECTS

CampusConnect: Multi-Sports, Events and Contest Platform | *MERN Stack* [GitHub](#) | [Live Demo](#)

- Developed backend services for a MERN-based multi-college sports and event management platform supporting students, organizers, and admins.
- Designed and implemented **35+ RESTful APIs** using Node.js, Express.js, and MongoDB for authentication, event management, registrations, payments, and result handling.
- Integrated **JWT authentication**, role-based access control (RBAC), Razorpay payment gateway, and automated email notifications via Nodemailer for secure and scalable workflows.

ManageMate: Daily Productivity Web App | *React.js, Tailwind CSS, JavaScript* [GitHub](#) | [Live Demo](#)

- Built a premium productivity application integrating a To-Do List, Notes, and Expense Tracker with responsive UI and reusable component architecture.
- Implemented React Context API-based state management, dynamic expense analytics, LocalStorage persistence, custom modals, and interactive UI features for a smooth user experience.

URL Shortener | *Node.js, Express.js, MongoDB* [GitHub](#)

- Built a secure and scalable URL shortening platform with JWT authentication and role-based access control.
- Developed **10+ RESTful APIs** for URL generation, authentication, analytics tracking, and user management; rendered dashboard server-side using EJS with nanoid-based collision-resistant short URLs.

Other Projects: Sewage Monitoring System, Gesture Recognition System

ACHIEVEMENTS

- Qualified **GATE 2026 (CSE)** with a score of 431.
- Semifinalist in **ET GEN AI Hackathon**, worked on Personalized News Recommendation System
- Solved **300+ Data Structures and Algorithms** problems on LeetCode and GeeksforGeeks – LeetCode Profile.
- Participated in **Smart India Hackathon 2025**, worked on Gesture Recognition System.

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University, Lucknow **2022 – 2026**

Bachelor of Technology in Information Technology **CGPA: 7.85**

Relevant Coursework: Computer Organization and Architecture, Data Structures, Operating Systems, Theory of Computation, Compiler Design, Computer Networks, Database Management Systems, Data Analytics, Software Engineering

CERTIFICATIONS

- GFG Certified in Problem Solving** – Certificate
- IBM: Introduction to Artificial Intelligence** – Certificate
- HackerRank CSS Certificate** – Certificate
- IR4.0 Foundation Certification** (TechSaksham – Microsoft & SAP)
